MEET OUR PARTNERS

In a world increasingly confronted with the urgent need for food and nutrition security, our business champions and partners are making tremendous strides in improving the horticulture sector. The HortiNigeria program is facilitating the sustainable and inclusive development of a national horticulture sector that will contribute to food and nutrition security. The program, which kicked off on November 1, 2021, is working in the states of Kaduna, Kano, Ogun and Oyo. In the two southwestern states of Ogun and Oyo, the program is piloting some production system innovations and regional diversification, while in the two northern states, the program is sharing knowledge on eco-efficient good agricultural practices in vegetable production, mostly in open fields. Other efforts include improving farmers' access to financial services and enhancing sector coordination and business-to-business (B2B) linkages.

HortiNigeria works with smallholder and entrepreneurial farmers, horticulture-related micro, small and medium enterprises (MSMEs), and other stakeholders in the value chain to build market-led public-private partnerships (PPPs). The target includes 50% youth-led and 40% women-led PPPs that guarantee access to structured and unstructured markets.

Central to our impacts and successes are HortiNigeria's Business Champions—dynamic entities each contributing uniquely to the fabric of the horticulture ecosystem. From Soilless Farm Lab's hydroponic marvels to Afri Agri Products Ltd.'s resilient seeds and CANDEL's premium quality and tailored agrochemicals, our partners are at the forefront of ensuring food and nutrition security through technology, education, and sustainable practices.

Simkay Foods, Beta Agric, Mix Condiment, & Smiley'z Mobile Kitchen Limited champions reducing post-harvest losses, while Ecotutu introduces innovative cold storage solutions to extend the shelf life of fresh produce. These stories of innovation along with those of BIC Farms Concepts, Greenaly, SwanCape, Farm Help Agrostores and many others', show the opportunities that can be explored in the Nigerian horticulture ecosystem.

As you navigate through the catalogue, each partner's profile offers a window into the future of Horticulture in Nigeria—a future that is being built today through innovations, partnerships, business-to-business linkages and a deep commitment to community and environmental stewardship. Whether it's through cutting-edge greenhouse technology, sustainable soilless farming or strategic market linkages, our partners are laying a foundation for a food and nutrition-secure country.

This learning event provides an opportunity for HortiNigeria and various stakeholders to become aligned and exchange perspectives and knowledge. Ultimately, the goal is to foster collaboration within the horticulture sector on key issues.

Eupepsia Place Limited
Soilless Farm Lab

07087995725 | p.okwara@sfarmlab.com | Awowo, Ewekoro LGA, Ogun State

A Brief Overview of the Company

Soilless Farm Lab was established in 2019, and operations started in January 2020. We are a technology provider that ensures food production is not seasonal because hunger is not seasonal. We offer farming (climate-smart agriculture [CSA], soilless farming), training (paid and free), and market linkages. We have the highest number of greenhouse hydroponics in South West Nigeria and have become one of the largest horticulture companies in the country. We have provided training to over 1,000 youths at no cost every quarter since January 2022. We pride ourselves as one of the largest suppliers of vegetables in Lagos.

Samson Ogbole
Founder

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Impact

We are today the largest horticulture company in the South West using greenhouse and soilless farming technology. We are one of the few companies that has been able to keep our price constant annually for customers, with our approach called Food Lock.

Partnership with HortiNigeria

Food is business and we are in the business of food. If you wish to key into horticulture or need hands to help run your farm, we are expanding to Rwanda, Zambia, and other countries. We are a success despite many farms closing down. Who would you rather work with?

Looking Forward

We are currently setting up in Rwanda and Zambia. We also have plans to set up in Europe before the year is over. We plan to begin processing vegetables. This year, we are working to build an extra 320 greenhouses with hydroponics, 90 of which have already been built.

HortiNigeria

Tomato Jos Farming and Processing Ltd

+234 912 405 5052 | mira@tomatojos.net | Plot 1, Tomato Jos Road Off Old Jos Road, Km 11 Kagimi Dam, Igabi LGA, Kaduna State, Nigeria

A Brief Overview of the Company

Tomato Jos is an innovative agribusiness based in Kaduna State that is transforming Nigeria's tomato value chain. Founded with a mission to bridge the gap between smallholder farmers and markets, the company integrates farming, processing, and distribution to create a sustainable model that improves local food systems.

By cultivating tomato on its own farms and sourcing directly from smallholders, Tomato Jos ensures consistent quality and supply while reducing dependence on imports. Tomato works with smallholder farmers on its own farm by providing irrigation infrastructure and service, extension service, agronomic service, tractor and harvest service. It also works with smallholder farmers outside farm all to ensure consistent quality and supply while reducing dependence on imports.

Mira Mehta
CEO/MD

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Impact

Over the years, Tomato Jos has empowered thousands of farmers through training, inputs, and market linkages, enabling them to achieve higher yields and stable incomes. Its processing operations add value by turning fresh tomatoes into affordable, high-quality paste for Nigerian consumers. This model not only strengthens food security but also generates jobs, reduces post-harvest losses, and keeps more of the tomato economy within Nigeria. Tomatojos is the most gender inclusive commercial smallholder model with over 50% women in its smallholder program. And all her farmers are included in a health insurance initiative to reduce out of pocket expenses. And yield of 40MT average which is more than 7x national average which some farmers getting yields above 80MT per hectare

Partnership with HortiNigeria

Through its collaboration with HortiNigeria, Tomato Jos has benefited from technical support and access to capacity-building initiatives that enhance both farmer productivity and processing efficiency. The partnership aligns with HortiNigeria's goal of building sustainable and inclusive horticultural value chains, ensuring that smallholder farmers linked to Tomato Jos gain improved agronomic knowledge, stronger market access, and more competitive returns.

Looking Forward

Tomato Jos is poised to expand its processing capacity and strengthen farmer networks across northern Nigeria. With continued investment in technology, climate-smart practices, and farmer Tech-enabled training and extension, the company seeks to become a model for inclusive agribusiness. Its future focus remains on scaling impact—empowering more farmers, boosting local tomato paste production, and reducing Nigeria's reliance on imports while contributing to a thriving domestic food industry.

HortiNigeria

Afri Agri Products Ltd

02012958045 | sales@afri-agri.com | No. 4 Metal Box Road, Off Acme Road, Ikeja, Lagos

A Brief Overview About the Company

Afri Agri Products Ltd was established in 22 May 1998. We don't just supply; we support. Our cornerstone philosophy of “Supply and Support” sets us apart, with a focus on delivering top-tier horticultural seeds and inputs alongside unmatched agronomic support. Our mission is to empower farmers, ensuring food security, safety, and sustainability through resilient food production practices.

We offer a comprehensive portfolio designed to meet or exceed the needs of modern horticulture: **Vegetable Seeds** ***(a diverse selection tailored for Nigerian climate resilience and yield)***, **Biological Systems** ***(innovations for eco-friendly pest and disease management)***, **Growing Media** ***(including our pioneering washed and buffered cocopeat, alongside premium potting soil, designed for optimal plant growth)***, **Water-Soluble Fertilizers** ***(customized nutrient solutions for diverse vegetable crops)***, **Seedling Trays, Mulch Foil, and Trellis Clips** ***(essential accessories for efficient and productive farming)***, **and Soil Sampling and Soil Analysis (*groundbreaking services ensuring the health of your soil for generations to come.)***

As a leading force in the Nigerian hybrid vegetable seed market, Afri Agri Products Ltd stands out not only for our product innovation but also for our pioneering educational initiatives. We take pride in being among the first companies in Nigeria to host seminars aimed at improving agricultural yields.

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Impact

Afri Agri Products Ltd has been instrumental in revolutionizing agriculture across Nigeria. By supplying top-tier seeds, fertilizers, cocopeat, and other essential inputs, we have enabled farmers to significantly enhance both crop yields and quality. Beyond products, our commitment extends to empowering the farming community with access to vital training, cutting-edge information, and sustainable technologies. Our efforts ensure that farmers are equipped to adopt more efficient and sustainable farming practices, paving the way for a greener future.

Partnership with HortiNgieria

Discover the future of agriculture with Afri Agri Products Ltd with HortiNigeria. Dive into the latest products, technologies, and insights shaping Nigerian horticulture.

Looking Forward

Our vision is expanding into tangible reality as we develop our demonstration and trial farm in Makun, Ogun State. This initiative is focused on varietal testing of seeds specifically for the South West macroclimate, aiming to introduce farmers to seed varieties that offer not only high yields but also comprehensive disease resistance. By tailoring our efforts to the local environment, we are laying the groundwork for even greater agricultural success and sustainability.

HortiNigeria

Smiley'z Mobile Kitchen Limited

+234 817 653 2330 | Smileyzmobilekitchen@gmail.com | Kaduna/Nigeria

A Brief Overview of the Company

Smiley'z Mobile Kitchen was established in 2019. We stand out for our commitment to reducing post-harvest losses while empowering local communities. Our inclusive business model focuses on sourcing fresh tomatoes directly from smallholder farmers, thereby minimizing waste and creating economic opportunities at the grassroots level. Unlike competitors, we pride ourselves on offering 100% natural products without concentrates or additives, appealing to health-conscious consumers. We are a leading agro-food processing brand in Nigeria, specializing in high-quality tomato-based products and healthy snacking alternatives. Our flagship offerings include Smiley'z Tomato Paste, Smiley'z Tomato & Tatashe Paste, Smiley'z Pepper Sauce, Smiley'z Sugar- Sweetened Granola, Smiley'z Honey-Sweetened Granola, and Smiley'z Date-Sweetened Granola. We prioritize sustainable sourcing, quality assurance, community empowerment, and environmental stewardship, making us a trusted choice for consumers and a driver of positive change in the agro-food sector. We are a rare gem in Nigeria's agro-food industry, known for its innovative products and sustainable practices. We have captured a significant market share with our premium offerings and have experienced impressive growth rates driven by consumer demand for natural, locally sourced products. Our commitment to excellence has earned us recognition and awards, cementing our position as a trusted leader in the industry. With a focus on continuous improvement, we are well-positioned for further success and impact.

Ogola Lois Kange
CEO

Impact

Smiley'z Mobile Kitchen Limited has had a significant impact on both the market and the community. Through sustainable sourcing practices and partnerships with local farmers, we have strengthened the Nigerian horticulture subsector by providing a stable market for fresh produce and reducing post-harvest losses. This has empowered smallholder farmers and promoted economic resilience. Additionally, our focus on producing high-quality, nutritious foods has improved food and nutrition security by offering wholesome alternatives and promoting access to healthy options, particularly in underserved communities.

Partnership with HortiNgieria

Smiley'z Mobile Kitchen Limited partnership with HortiNigeria is an exclusive opportunity to shape the future of the agro-food industry! As a leader in sustainable food processing, we are thrilled to unveil our products and ideas that will revolutionize the way we cultivate, process, and enjoy fresh produce. At our booth, attendees will have the chance to explore our innovative solutions for reducing post-harvest losses, empowering local farmers, and promoting environmental sustainability. If you are interested in sustainable impact, engage with our team to learn about exciting collaboration opportunities and investment prospects.

Looking Forward

Exciting times lie ahead at Smiley'z Mobile Kitchen Limited as we prepare to introduce new products that not only expand our offerings but also diversify our range, cater to evolving consumer needs, and pave the way for greater community impact. Alongside our new product launches, we are dedicated to fostering the growth and financial independence of our community of women. Our upcoming initiatives will focus on providing women with the resources and support needed to thrive in the agro-food sector. Through skills development programs, entrepreneurship training, and access to market opportunities, we are committed to empowering women to take charge of their futures and build successful businesses.

HortiNigeria

National Horticultural Research Institute (NIHORT)

+234 (0) 802 225 5504
info@nihort.gov.ng
edoffice@nihort.gov.ng
www.nihort.gov.ng
P.M.B. 5432, Jericho Reservation Area, Idi-Ishin, Ibadan, Nigeria

A Brief Overview of the Company

The National Horticultural Research Institute (NIHORT) is Nigeria's foremost institution dedicated to horticultural research, development, and training. Established to strengthen the country's fruit, vegetable, ornamental, and medicinal plant industries, NIHORT conducts cutting-edge research, develops improved crop varieties, and promotes technologies that address food security, nutrition, and climate resilience. It also serves as a national hub for knowledge transfer, providing training, extension services, and policy support that connect research outcomes directly to farmers, agribusinesses, and markets.

Muhammed Lawal Attanda
Executive Director

Impact

Over the years, NIHORT has played a pivotal role in transforming Nigeria's horticulture sector. From developing high-yielding crop varieties to introducing eco-efficient post-harvest solutions, its work has reduced losses, improved productivity, and enhanced incomes for farming households. By equipping farmers and entrepreneurs with practical skills and innovations, NIHORT has contributed significantly to better nutrition, stronger rural economies, and inclusive growth.

Partnership with HortiNgieria

Through its collaboration with HortiNigeria, NIHORT has extended its impact in the value chain. This can be seen in the rehabiltaion of the Cold storage system in NIHORT, solar power irrigation systems installed for youth within Markfem Entrepreneurial hub, international trade fairs implemented within the facility and knowledge dissemination and sharing on best agronomic practices amongst stakeholders. This partnership bridges the gap between research and practice, ensuring that innovations are tested, adapted, and scaled in ways that directly improve farmer productivity and market access.

Looking Forward

NIHORT aims to position itself as a driver of sustainable horticultural development in Nigeria and beyond. Its focus will include expanding research on climate-smart technologies, strengthening industry partnerships, and empowering youth and women in agribusiness. By doing so, NIHORT will continue shaping a resilient and competitive horticulture sector that supports national food and nutrition security.

Ecotutu

08028117382 | info@ecotutu.com | 9 Bakare Dawodu Street, Gbagada, Lagos, Nigeria

A Brief Overview of the Company

Ecotutu was established in 2020 and provides a suite of solar-powered cold storage solutions to fill Nigeria's fresh food supply chain gaps. Through its flagship "pay-as-you-chill" model, Ecotutu offers cooling and logistics services and facilitates marketplace opportunities for retailers and wholesalers, without the need for high upfront cost. This helps extend the shelf life of horticulture produce from 2 to 21 days and reduce post-harvest loss by 85 percent.

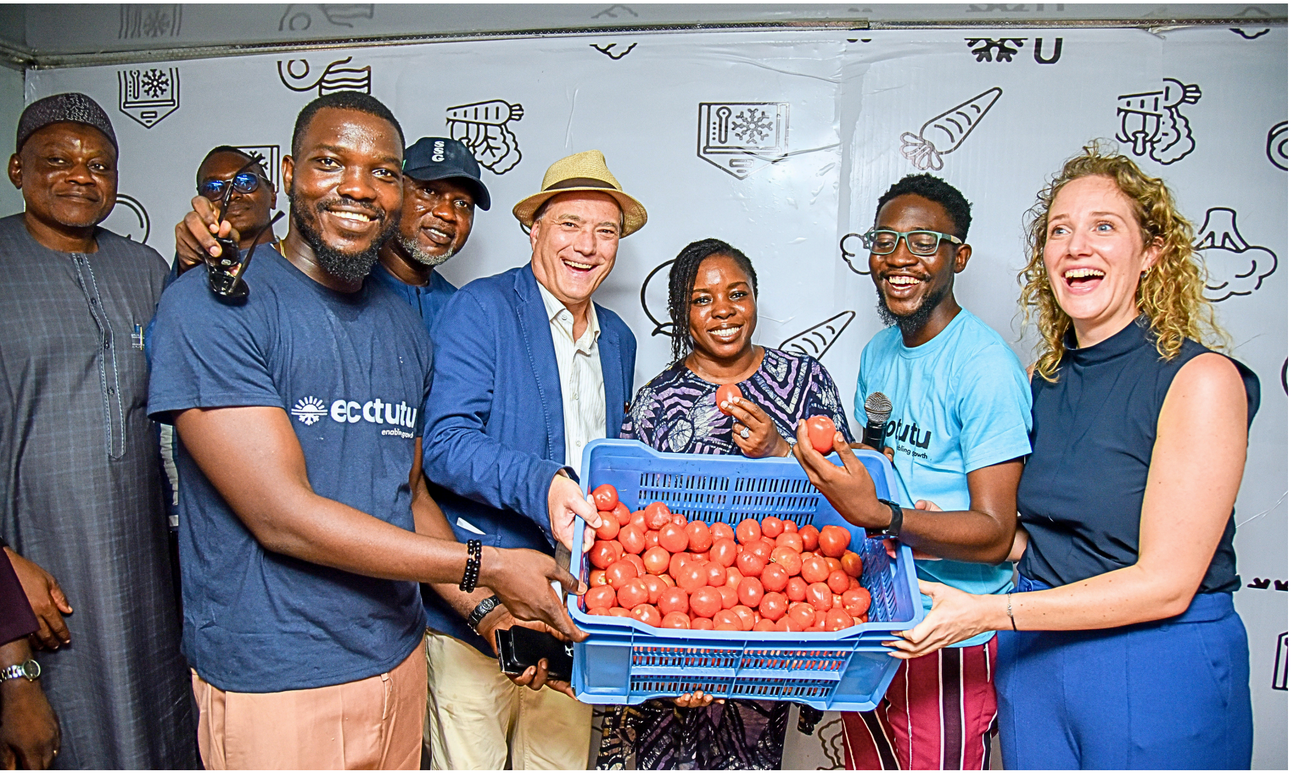
Our products include **Ecotutu Hub** *(a solar-powered walk-in cold room setup in farm clusters and open markets, either on a cooling-as-a-service basis or outright sale)*, **Cooler Bag** *(a reusable insulated bag used for distribution of temperature-sensitive products)*, **Ice Cell** *(a reusable non-watery ice gel use for keeping the temperature within the required range, especially on the go)*, and **Logistics** *(we facilitate added logistics and market-linkage service for business in the food value chain).*

Ecotutu is in prime position within the Nigerian cold chain industry as a leading cost-effective cooling technology provider. The company has been recognized and supported nationally and internationally by reputable entities, including Zenith Bank, Roddenberry Foundation, and the Dutch government through the Orange Corners program, to name a few.

Babajide Oluwase
Founder

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR



Impact

Over the years, we have enabled over 1,500 farmers, traders, aggregators, and processors to have access to affordable and reliable cold chain solutions, mostly without the need for any high upfront cost. This means businesses can focus on their core business activities while Ecotutu take care of their cold chain needs. Consequently, they experience less waste and increased revenue to grow their horticulture business.

Partnership with HortiNigeria

Our partnership with HortiNigeria will span through all Northern and Southern region of Nigeria by reducing post-harvest loses of vegetables and increasing value to farmers. Through the HortiNigeria Program we have installed a cooling hub at the Eupepsia Soilless Farm lab to reduce post harvest loses for young entrepreneurial farmers in the EiYA Hub Awowo Ogun State.

Looking Forward

As we look ahead to the future, our vision is clear: to be the leading company revolutionizing the African cold chain industry with sustainable, innovative solutions that empower businesses and safeguard our planet. To pursue this vision, we will expand into new markets, continue to invest in research and development, and embrace strategic collaborations

HortiNigeria

The Seed Project Co Ltd

+2348034990418 | seedprojectcoy@gmail.com | KM 48 Kadawa Zaria Road, Kano

A Brief Overview of the Company

The Seed Project Co Ltd was established in September 2005, pioneering the provision of premium, locally sourced, climate-resilient vegetable seeds in Kano. We are revolutionizing Nigeria's agriculture sector through innovation, sustainability, and excellence. By offering affordable seeds, we empower farmers to boost crop yields and enhance agricultural productivity. Strategically located at the heart of the country's vegetable production hub, we efficiently produce and distribute high-quality seeds. Our industry-leading expertise, strategic partnerships, and commitment to customer satisfaction position us as a formidable force in advancing food security and economic prosperity. Additionally, we champion women's empowerment, promoting gender inclusivity and economic opportunities in the agriculture sector.

Our products and services include:
Arable crop seeds: *rice, maize, sorghum, millet, cowpea, groundnut, soybean, and wheat.*
Vegetable seeds: *tomato, carrot, onion, lettuce, cabbage, okra, watermelon, and pepper.*
Trainings.

Zainab Lawal Gwadabe (Ph.D.)
Managing Director/CEO

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Impact

Since inception, the company has reached thousands of farmers. Our commitment extends to women's empowerment through inclusive farming initiatives, engaging female farmers and promoting gender inclusivity. By providing resources and training, we uplift communities and strengthen the role of women in agriculture, creating positive socio-economic impact across Nigeria.

Partnership with HortiNigeria

Our industry-leading expertise, strategic partnerships, and commitment to customer satisfaction position us as a formidable force in advancing food security and economic prosperity. Additionally, we champion women's empowerment, promoting gender inclusivity and economic opportunities in the agriculture sector.

Looking Forward

Our vision for the future is to revolutionize agriculture through sustainable agricultural practices and innovative solutions. We aim to expand our reach, offering high-quality seeds, climate-resilient seeds, and cutting-edge technologies to farmers across Nigeria and beyond. Embracing industry trends, we are committed to addressing climate challenges, empowering farmers, and enhancing food security. Through strategic partnerships and continuous research, we will lead the way in developing resilient crops and promoting eco-friendly farming methods. Together, we will shape a brighter, more sustainable future for agriculture, ensuring prosperity for generations to come.

BIC Farms Concepts

(+234) 8034079631
(+234) 812 854 6244
bichydroponicsng@gmail.com
training@bicfarmsconcepts.com
1 -2, BIC Soilless Technology farms, off Dennis Akanmu Street, OGD Estate, Asero, Abeokuta, Ogun State

A Brief Overview of the Company

BIC Farms Concepts was established in October 2006. We are scaling up the deployment of modern agricultural technology in Africa, including Nigeria. We are Nigeria's premier and most innovative hydroponics technology systems company. Our specially crafted training and empowerment module is coupled with localized modern and innovative greenhouse and hydroponics system fabrication and design delivery.

We make hydroponics technology and soilless commercial farming practices affordable and practicable for Nigerians and Africans at large, ensuring good and quick return on investment. We provide reskilling and upskilling training for youths and women through practical, comprehensive, focused green skills development as well as placements in our flagship training programs: Graduate Agripreneurship Apprentice Programme (GAAP) and Youth Agripreneurship Apprentice Programme (YAAP).

We are involved in tropical high-tunnel greenhouse fabrication and installation, responsive drip irrigation (RDI), responsive drip hydroponics system, sub-surface drip soaker irrigation system, aquaponics technology, agribusiness and value chain development, substrate production, biochar production and processes, localized protocol and GAP design for hydroponics and soilless farming, training, advisory and consultancy services.

As Africa's leading hydroponics, green skills, and circularity training company, BIC Farms pioneered and introduced rice husk, grow mix and biochar into hydroponics systems set up in Nigeria. We have trained individuals and organizations across West, East, and North Africa.

Debo Onafowora
Managing Director/CEO

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Impact

Direct impact: over 40,000 trainees across Africa, 2000+ new jobs/decent employment opportunities created. Trained 500+ on skills aquisition programs, 150+ on Hydroponics farm and garden setting, 200+ hectares of land under controlled environment technologies, 2 soilless farm hubs in Southwest Nigeria, also improved living conditions for all premised on increased productivity and earned income.

Partnership with HortiNigeria

Thinking of how to be part of the green economic revolution? Interested in taking action against climate change with sustainable agricultural production practices and systems? Are you an investor passionate about the next generation and interested in future agrifood system? Worried about how your agribusiness can thrive yet sustainability compliant? Connect with BIC farms concepts for:

- Building and setting up the best, affordable, sustainable, and localized commercial hydroponics/soilless farm that guarantees a good return on your investment.
- Sub-surface soaker drip irrigation system and installation.
- Green skills training and youth/women empowerment.
- Agribusiness investment and port folio design.
- Agribusiness and agritech advisory and consultancy.

Looking Forward

Our goals include:

- Raising 100,000 agripreneurs across Africa to create 1,000,000 green jobs focusing on agritech and agro-value chain development.
- Scaling and expansion into North America, Europe, and Asia to realize our vision of feeding Africa and the rest of the world.

Kaspharyn Solutions

+2347066515451 | kasfarin@gmail.com; info@kaspharynsolutions.com | Odeda, Ogun State, Nigeria

A Brief Overview of the Company

Kaspharyn Solutions was established in 2015. We deliver bespoke solutions and quality services in protected cultivation, green organic agriculture, and post-harvest activities using locally available resources optimally and economically. We are involved in greenhouse farming, soil and soilless agriculture (hydroponics), and greenhouse construction for crops, nurseries, snails, and mushrooms. We fabricate galvanized greenhouse and build wooden greenhouses for farmers and investors. We provide training and consultancy as well as after-sales support for our clients. We are involved in organic agriculture and provide solutions in integrated pest management (IPM), biopesticides, botanical pesticides, microbial solutions, beneficial organisms, biochar culture/carbon farming, compost, organic fertilizer, and agrominerals. We also construct natural cool stores (charcoal cool storage) and solar dryers (passive, active, and hybrid).

Major technologies and innovations we have been promoting at Kaspharyn in recent years include:

1. Biochar Technology (PLB, CRH) and other Organic Inputs.
2. Greenhouse Technology (Both Wooden and Galvanized Greenhouses).
3. Solar Drying Technology (Passive, Active and Hybrid Solar Dryers).
4. Evaporative Cooling Technology (Charcoal Cool Storage).
5. Renewable Energy (Biogas and Solar Pump).

We are the leading fabricator of local greenhouses (both wooden and galvanized) and solar dryers of different types in Nigeria. More than 1,000 youths and women have adopted our greenhouse and solar drying technologies through our trainings, consultancies, publications, YouTube channel, and social media posts, website/blog posts, and project execution.

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Candel FZE

07035331070 | Info@candelcorp.com | CANDEL FZE - f - 08 - 004, Along N4 - E7 Road, Lekki Free Zone, Manufacturing area, Tiye Town, Akodo, Ibeju-Lekki. P.O. Box 54952, Ikoyi, Lagos, Nigeria

A Brief Overview About the Company

Candel was established in March 2011, and we are a leading agrochemical company in the Industry. We have a first-class agrochemical formulation factory in Nigeria located at the Lekki Free Zone, which supplies not just the Nigerian market but also the West and Central African region, a potential generator of foreign exchange for the Nigerian economy. Since its inception, the company through innovation and research has engaged in the manufacture, marketing, and distribution of agro-inputs such as herbicides, fertilizers, insecticides, seeds, etc.

Harry Nnoli
Managing Director

Impact

The company is involved in the manufacture of high-quality agrochemicals – herbicides, insecticides, and foliar fertilizers, which were developed for our climate. Our products are attested to as some of the best in the market. Our foliar fertilizers have been proven to improve crop yield by between 60% and 120%, depending on the crop. The company also engages in training and education of farmers on the proper use of the chemicals for the best results.

Partnership with HortiNigeria

Candel FZE currently has an installed capacity of 80 million liters annually. The current utilized capacity is about 60%. Therefore, the company has excess capacity that can be deployed in the manufacture of other brands.

The company also has a fully installed laboratory where it continues to carry out research and innovation. Through its activities in the laboratory, Candel has developed new products and improved on existing products, all targeted at addressing local needs.

Looking Forward

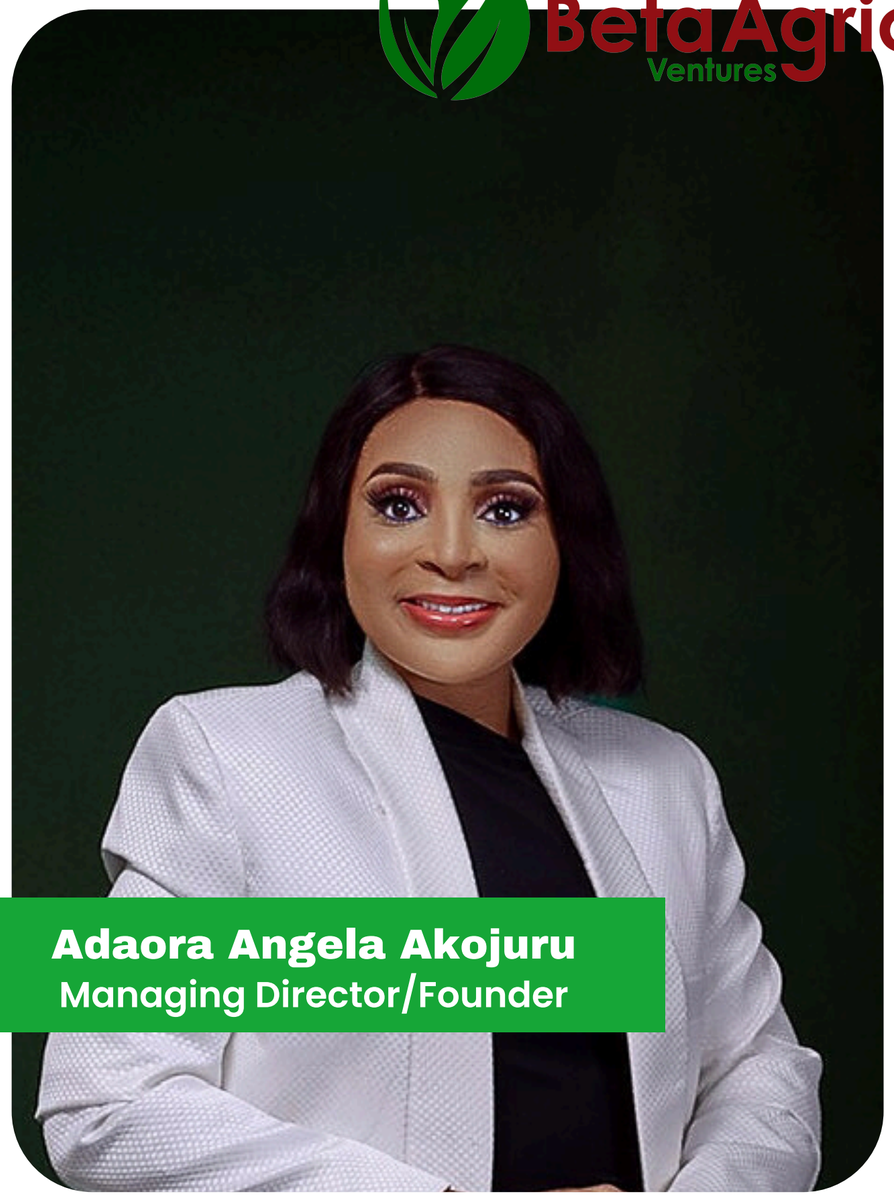
Candel already has a presence in Ghana, where its products are sold. The company's products are also available in the Togolese market. The company plans expansion into other sub-Saharan African countries, starting with Cote d' voire, where some of its products are already registered.

Beta Agric Ventures LTD

08165314339 | betaagricventures@gmail.com | Kano State, Nigeria

A Brief Overview of the Company

Beta Agric Ventures LTD was established in 2019, providing innovative solutions for food security. Beta Agric Ventures LTD offers its signature 100% natural tomato and pepper pastes processed from high-quality tomatoes, peppers, and onions, which are methodically sourced from local farmers in our host community. This value addition process is essential to curbing post-harvest losses and wastage in widely consumed perishables, and our end products target absolute cooking convenience and healthy nutrition. Although we are a microbusiness, we recorded a reasonable 500% growth in raw materials absorption within three years of operation, just as our clientele base is now spread across eight major cities in Nigeria and one other overseas.



Adaora Angela Akojuru
Managing Director/Founder

Impact

Our company's impacts include, but are not limited to, sustaining the livelihoods of over 300 farm laborers across five LGAs in Kano State, curbing post-harvest losses in fresh tomatoes and other perishables, reducing poverty and financial crises among farmers, creating jobs for women and youths directly and indirectly, promoting women's empowerment through trainings in food processing, and advancing healthy food consumption/healthier nutrition among the Nigerian populace.

Partnership with HortiNigeria

This partnership provides an enormous and exclusive platform for collaboration and investment and showcases innovations in products or technologies, which will ensure food security. Our commitment to the Dutch Funded HortiNigeria program will go a long way to reduce post-harvest losses and create sustainable employment opportunities for women in our community.

Looking Forward

We want to be able to establish a large-scale fully automated production plant that will deliver hygienic, safe, quality, and wholly natural pastes for households. We also want to be able to diversify into climate-smart precision agriculture.

Simkay Foods Limited

08121240975 | Simkayfoodsnig@gmail.com | No 2 Tabacco Road Muchiya Zaria, Kaduna State

A Brief Overview of the Company

Simkay Foods Limited was established in June 2018. We are an innovative social enterprise working to end post-harvest loss and food wastage in Nigeria's food system, with a vision to reduce global food insecurity and food crisis by 60% by 2030. Simkay Foods Limited works with smallholder farmers and cooperatives to offtake farm produce (tomato and potato) that would have otherwise gone to waste and process it into powder, ensuring a constant year-round supply to consumers. Lack of access to adequate processing and storage facilities limits vegetable crop farmers to go into large-scale production, posing a threat to the nation's food security. Simkay Foods is currently working with 22,000 smallholder farmers to save over 150,000 metric tons of tomatoes and vegetables annually from waste. Through the use of solar dehydrators, the produce is dried, processed into powder, and packaged using industry standards and free from additives and preservatives. The Simkay tomato, bell pepper, and onion powders are signature products that solve both food loss and waste: from farm to store to table, ensuring availability and affordability year-round. This model has been proven and will be applied across a variety of vegetable crops as part of the five-year growth plan of the enterprise. Simkay Foods Limited uses a hybrid distribution system for its products – direct sales from the company to retailers and indirect sales through distributors – across the six geopolitical zones in Nigeria.

Rejoice Usim
Managing Director/CEO

Simkay Foods
...the best from nature

Impact

Simkay Foods Limited has established a low-cost greenhouse scheme for farmers to sustainably produce a wide array of crops, ensuring non-seasonal year-round production of crops. This is a deliberate long-term plan to shift from traditional farming practices that are harmful to the environment to more sustainable climate-smart agricultural practices, specifically to help mitigate the challenges caused by climate change. We have a fully developed technological toolbox as our innovative solution. It is a collection of technology, methodologies, and techniques based on geographic information and remote-sensing systems.

Partnership with HortiNigeria

Partnering with HortiNigeria will become a big milestone in our project's goal of reducing vegetable waste and creating sustainable income to over 20,000 smallholder farmers, especially women and youths. With this partnership, we are sure of reducing post-harvest losses to about 60% by mopping over 60,000 tons of tomatoes from the market and processing it into powder.

Looking Forward

- Transition fully to an agritech company.
- Scale up production factory with a capacity of producing 50 metric tons of products per day.
- Launch the low-cost greenhouse scheme for rural farmers across Nigeria.
- Launch the low-cost dryer to enable availability of vegetables year-round.
- Dry chain production line for export.
- Simkay Seed Company for production of seeds bred in Africa for the African climate.

HortiNigeria

Tecni Seeds Limited

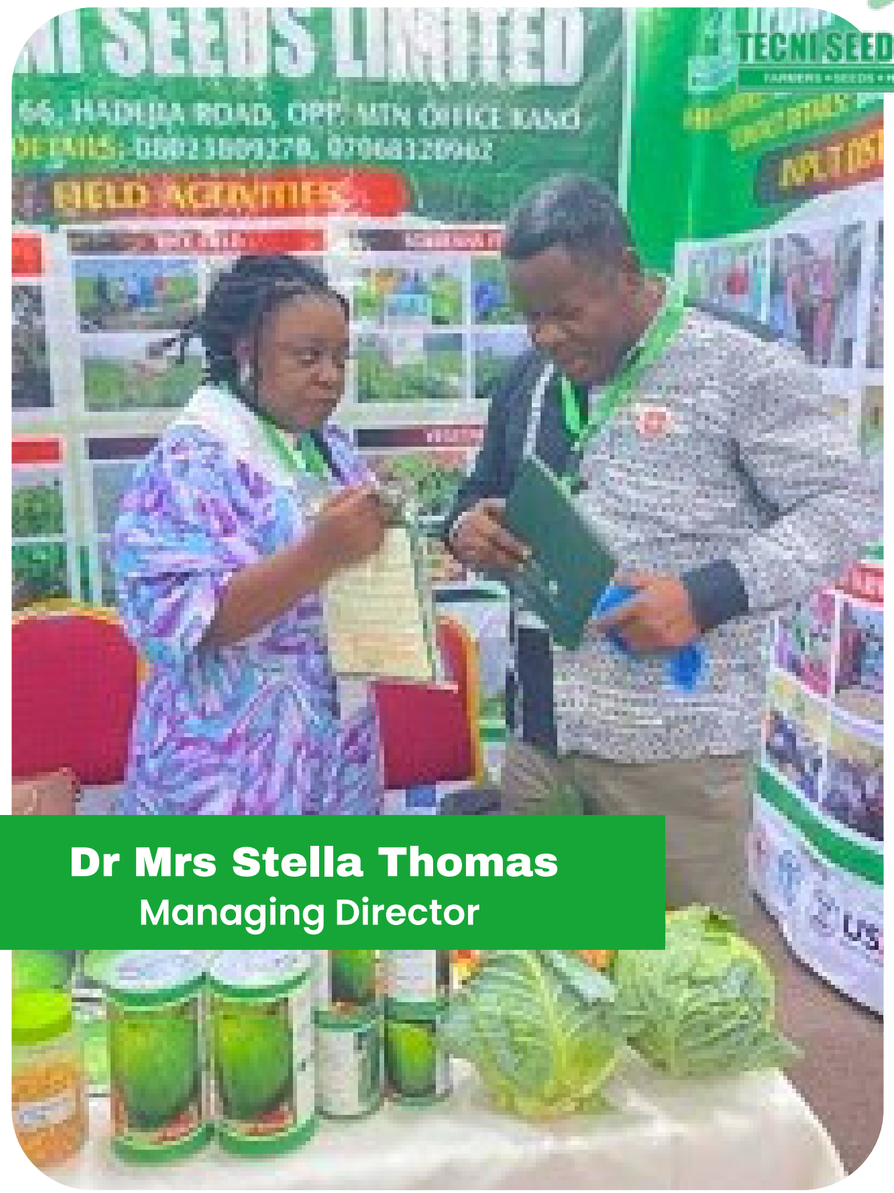
08023809270 | techniseeds@yahoo.com, tecniseeds12@gmail.com | Kano State, Nigeria

A Brief Overview of the Company

Tecni Seeds Limited was established in November 2011 as an innovative agricultural business and has over 10 years of experience in the agriculture sector. We have core capabilities in certified seed production, aggregating, processing, and marketing of quality seeds, agro-inputs, and grains. At Tecni Seeds, we redefine excellence in the agriculture sector through a unique blend of cutting-edge innovation, unwavering commitment to sustainability, and an unyielding focus on delivering unparalleled product quality.

Our commitment to new innovations includes reducing the distance from the seed company to farmers by establishing agro-dealer shops, promoting climate-smart resilient seed varieties, and recruiting over 10,000 farmers as out-growers across more than seven states in Nigeria. Our sustainability approach focuses on economic, social, and environmental sustainability:

- Production and marketing of improved and climate-smart certified seeds, e.g., maize (Sammaz 52), which is well known for providing vitamin A to infants and children, and rice (Faro 59), which is adapted to upland ecology and drought tolerant.
- Promotion of pod-borer resistant (PBR) cowpea, which mitigates Maruca and increases yield.
- Production of quality protein maize (Sammaz 50) and early maturing maize (Sammaz 27,28,29), sorghum (Samsorg 45, 46), and soybean (TGX 1951,1904).
- Capacity building training for staff, field officers, monitoring and evaluation (M&E), extension workers, Agricultural Development Program (ADP) staff, and farmers.
- Supply of grains to industrial producers and millers for processing to consumer goods.
- Gender mainstreaming and advocacy for women and youth inclusion in the agriculture value chain.
- Collaboration with NGOs, civil society organizations, government agencies, and cooperatives on the supply of certified seeds to farmers through various project programs and interventions.
- Recruitment and onboarding of out-grower farmers for large scale production of seeds and grains.



Dr Mrs Stella Thomas
Managing Director

Impact

Tecni Seeds has significantly impacted both the market and community by pioneering transformative practices in the agriculture sector. In the market, our innovative approaches have set new standards, reshaping the industry landscape and inspiring advancements. Simultaneously, our commitment to sustainable practices has not only elevated product quality but also fostered a positive influence on the local community. Through partnerships, educational initiatives, and community engagement, Tecni Seeds is actively contributing to the development of a more sustainable, resilient, and harmonious agricultural systems.

Looking Forward

At Tecni Seeds, our vision for the future is rooted in pioneering sustainable agriculture and technological advancements. We are committed to leading the industry in embracing precision farming, smart cultivation practices, and eco-friendly solutions. Our upcoming initiatives include strategic partnerships for global expansion, focusing on regions where sustainable agriculture can make a significant impact. As we adapt to emerging industry trends, we foresee integrating artificial intelligence and data-driven insights to optimize crop yield and resource utilization. With a relentless pursuit of innovation, Tecni Seeds is poised to shape the future of agriculture, ensuring a sustainable and prosperous tomorrow for farmers and communities worldwide.

Solokad

07038034142
08033484457
08055203022

solokadmultiventures@gmail.com

No 105, Aminugun Street, Ogunpa,
Ibadan, Nigeria

A Brief Overview of the Company

Solokad is an indigenous agricultural company that markets high-tech affordable solutions to farmers. We have a policy of marketing only the highest quality products to farmers and contributing to the growth and development of agriculture in the country. Solokad has been in operation for three decades. We continue to strive to find a tailored-to-fit solution for every shopper. We market products that range from agrochemicals, organic products, fertilizers, protective equipment, and simple farm implements/machinery, high-quality seeds of vegetables, grains, and nuts, and vigorous plant seedlings ready for transplanting to the farm. We offer pest control services to homes, offices, schools, industries, and storage facilities and offer training, and consultancy to farmers. Solokad is passionate about value chain addition and has partnered with the government and local and international organizations to promote initiatives to uplift the socio-economic status of rural people, especially women and youths, which is critical to attaining food security in Nigeria

Solokad works closely with farmers to promote environmentally friendly farming methods that can help cushion the effect of climate change, which has devastating effects on crop yields and food security. We engage in wholesale of high-quality products to farms, government, and non-governmental organizations, agents, and numerous retailers at competitive prices.

ADENITAN BLESSING
Managing Director

Impact

We are a reliable link between the producers of high-quality and cutting-edge agricultural solutions and the farmers who need them.

Partnership with HortiNigeria

Our collaboration with HortiNigeria has provided us a platform of business-business linkages with other producers, where we showcased and supplied high quality vegetable seeds and inputs for optimum productions.

Looking Forward

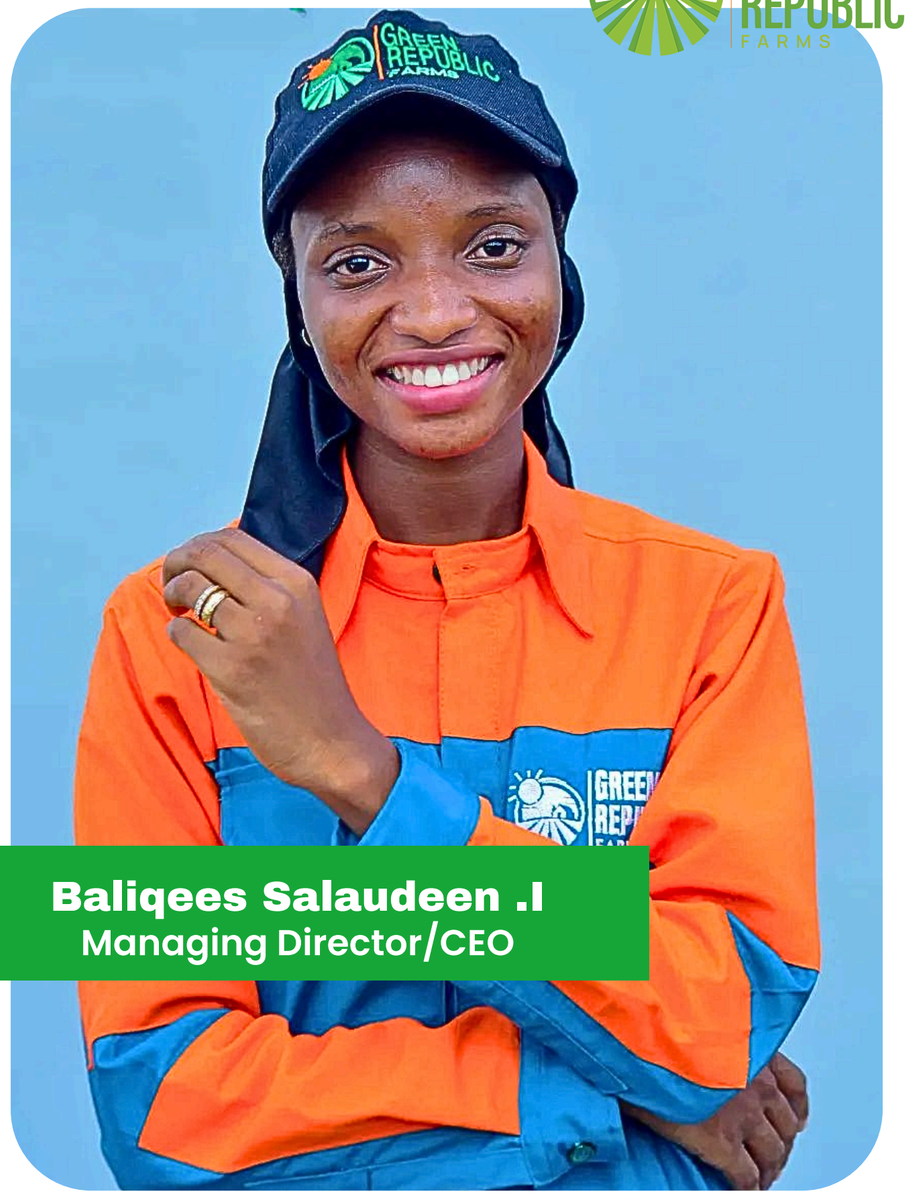
We are looking forword to making agricultural solutions available to every farmer in Nigeria by making pioneering and innovative options available to our clients.

Green Republic Farms Limited

+2347089952644 | Greenrepublicfarmslimited@gmail.com | Olokuta Village, Oluyole Local Government, Ibadan, Oyo State, Nigeria

A Brief Overview of the Company

Green Republic Farms was established in September 2020 as a sustainable agricultural social enterprise. We utilize climate-smart farming techniques, including controlled environment open field, soilless and soil greenhouse farming, and renewable energy to cultivate healthy and high-quality habanero, tomato, bell pepper, and other peppers, and vegetables. With our strategy of farming close to the market, we provide fresh, locally grown produce to the southwest, cutting down on post-harvest losses often recorded in the horticultural market. We use drones for land mapping, surveillance, and storytelling. Future plans include the adoption of special drones for field fumigation. Our work is empowering women and young people in Olokuta village and neighboring communities.



Baliqees Salaudeen .I
Managing Director/CEO

Our impact

We have strategically located our climate-smart farming operations close to major markets, particularly in the southwestern region of Nigeria. Our farm at Olokuta Village, Oyo State, is just an hour and 10-minute drive to Mile 12 Market in Lagos State, 30 minutes to Ogere Market in Ogun State, an hour to Kuto Market in Abeokuta, and 45 minutes to Oja-oba Market in Ibadan. This significantly reduces the transportation emissions associated with long-distance travel from northern Nigeria, where the majority of perishable foods, such as peppers and vegetables, are cultivated, often a 48-hour or longer trip to the southwest markets.

All our produce is cultivated with zero emissions, as our farm is powered by renewable energy.

By minimizing the carbon footprint of our produce, we contribute to a more sustainable food system and reduce the environmental impact. With this, we are able to supply healthy farm produce to our consumers.

Partnership with HortiNigeria

With our partnership with HortiNigeria, we have moved away from fuel to power our irrigation system to renewable energy. We will also be training 75 women on climate-smart farming in Olokuta village and neighboring communities in 2024.

Markfem Farms and Allied Services

234 803 218 2408 | markfemfarms@gmail.com | 28 Oba Adebimpe road, Ogunpa Ibadan. Oyo State, Nigeria

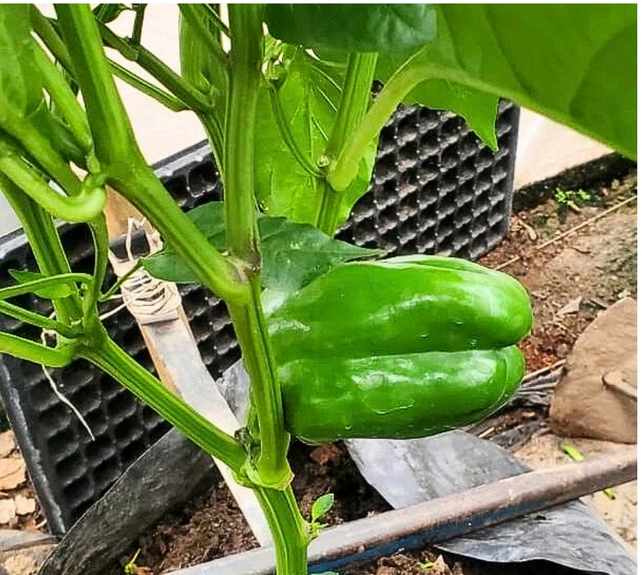
A Brief Overview of the Company

Markfem Farms and Allied Services was established in 2018 and is known for it innovative approach to ensuring good yield through good agricultural practices, introduction of good irrigation facilities and maintenance culture, and facilitation of good agricultural practices through trainings. We offer sales of irrigation facilities, consultancy services, trainings, irrigation installation, and farm setup. We produce good agricultural products from our farms. Markfem farms and Allied Services has impacted so many farms today through our detailed training platforms, which has really improved the agrifood industry.

Mark Oluwafemi Gbedze
Managing Director/CEO

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR



Impact

Markfem farms and Allied Service has contributed to the horticulture subsector by conducting trainings on good agricultural practices, providing irrigation systems for farmers and installation, and engaging in consultancy.

Partnership with HortiNigeria

Leveraging on the existing impact Markfem Farms and Allied service has made over the years of its operations, our partnership with HortiNigeria provides an opportunity to reach out to a wide range of farmers within a short period of time with new technology and foster good business.

Looking Forward

Ours is a strong desire to unease your daily stress for sourcing good fruits and vegetables that do not undermine your basic health and nutrition demands.
We intend to ensure all farmers and prospective farmers get the right knowledge through trainings about cultivation, hence guaranteeing good yield and quality products. This will ensure adoption of appropriate technologies and maintenance practices.

HortiNigeria

Farm Help Agrostores

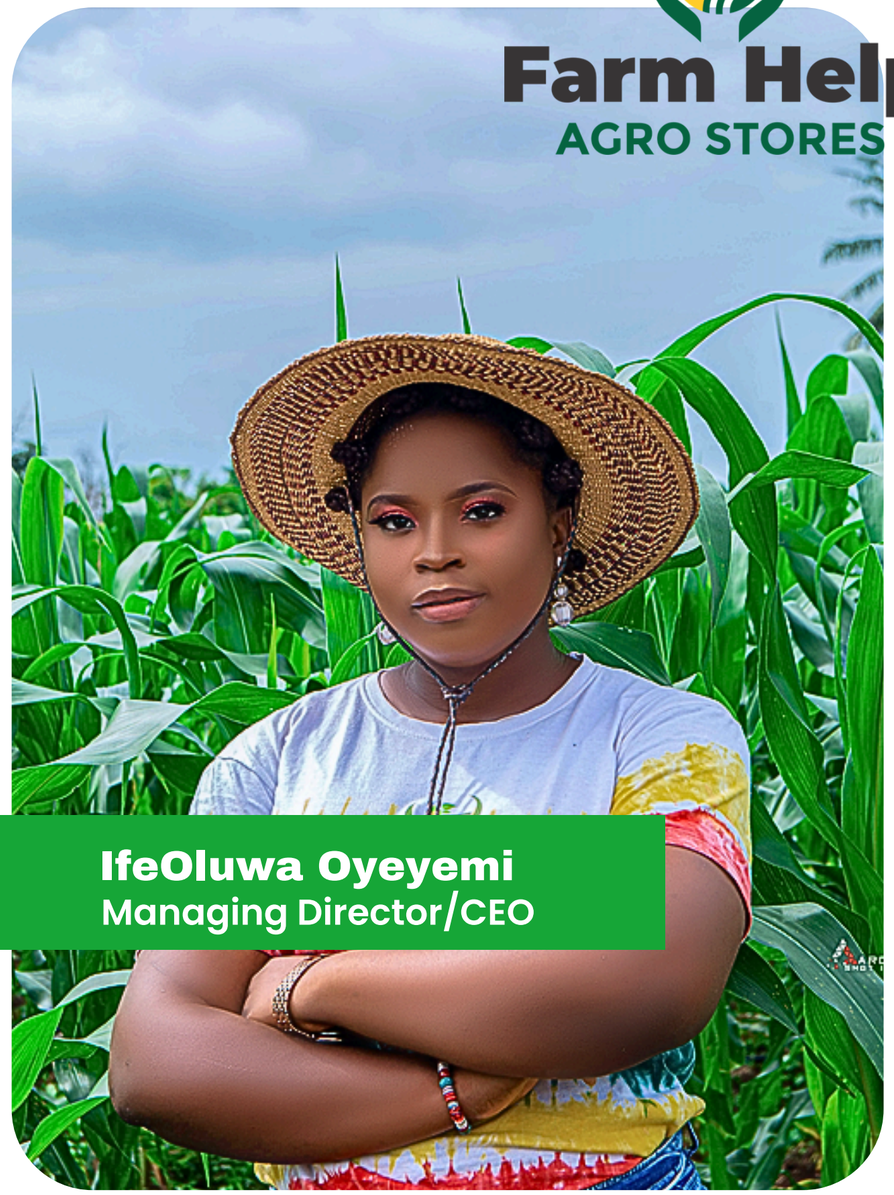
07061364728,
08145278879

farmhelpagrostores@gmail.com

Farm Help Agrostores Opp
The Apostolic Church, Moniya
Garage, Ibadan

A Brief Overview of the Company

Farm Help Agrostores was established in 2018 to help farmers prosper through our sales of quality and affordable agro-inputs with a unique way of following up with each customer to ensure their success. We offer agrochemicals, seeds and seedlings, fertilizers, irrigation materials and installations, greenhouse construction and management, market linkages, and trainings. We are a leading company providing excellent services to all, with numerous awards showcasing our excellence. With our free secondary and undergraduates agribusiness trainings, we have received various accolades, both local and global. The CEO of Farm Help Agrostores is the grand matron of the undergraduate agribusiness training and serves as a network manager for Syngenta Foundation and OCP Africa.



IfeOluwa Oyeyemi
Managing Director/CEO

Impact

We have trained more than 3,000 farmers on vegetable production, agribusiness, home gardening, and pesticide handling at no cost, both on air, online, and in person. We have trained and set up gardens for more than 20 secondary schools in Ibadan. We have also been able to introduce innovations to smallholder farmers across the country, helping them to achieve better results. We have a demonstration farm which helps our farmers on the selection of appropriate pesticides and hybrid seeds to enhance their livelihood. We have trained over 1,000 Akinyele Corps members on vegetables through the HortiNigeria program, encouraging them to participate in horticulture. We have empowered women in agribusiness and trained youth in agribusiness under the Netherlands program Youth in Agribusiness Scheme (YAS), facilitating their access to all they need in the sector.

Partnership with HortiNigeria

We offer a persuasive call to action for fair attendees, detailing exclusive opportunities for collaboration, investment, or showcasing new products or technologies that will be unveiled at the event. We will be showcasing quality and affordable agro-inputs, modern seedlings sales, innovations on how to have great returns on investment in vegetable production, and more.

Eweko Integrated Services

08068889592 | s.adams@ewekoconcept.com | Lagos,Nigeria

A Brief Overview of the Company

Eweko Integrated Services was established in 2020 as an firm engaged with horticultural and other relevant value chains, offering aggregation and agribusiness support services, with a focus on farmers and other value chain actors. The company also provides a digital supply chain platform for fresh produce. We enhance agricultural value chain development with support that promotes inclusive businesses and improves livelihoods, particularly within rural areas. Eweko integrates farmers, buyers, and other value chain actors into a digital commercial supply chain platform using technology to reduce transaction costs and post-harvest losses. Our platform is creating market linkages between farmers and buyers (institutional and local) of fresh produce, integrating out grower management systems to improve productivity and reduce cost, and facilitating relevant partnership to provide infrastructure, finance, input, and skills acquisition for improved productivity and scalable production using aggregated data for decision-making.

Saheed Adams
Co-founder

Impact

1.Increased Market Access for Farmers: Eweko provides a platform (ewekoaggregate.com) where horticulture farmers can easily connect with buyers. This reduces the intermediaries in the supply chain, allowing farmers to get better prices for their produce.

2.Improved Supply Chain Efficiency: By streamlining the procurement and distribution processes, Eweko helps to reduce post-harvest losses, which is a significant problem in the Nigerian horticulture sector.

3.Market Intelligence and Analytics: Eweko provides valuable market data and insights, which help farmers to make informed decisions about what crops to plant, when to harvest, and how to price their produce.

4.Promotion of Sustainable Agriculture: Eweko promotes sustainable farming practices, which help to preserve the environment and ensure the long-term viability of the horticulture sector.

5.Innovation and Technology Adoption: Eweko promotes the adoption of modern agricultural technologies and innovations, such as mobile apps for market access and agricultural extension services (weather and crop advisory).

Partnership with HortiNigeria

Eweko provides the innovations and business support services required to mobilize entrepreneurial farmers in hubs, creating an opportunity to build trust within the ecosystem. Building trust in the supply chain fosters integrity and continuous business relationships. Our tech-related services are in line with the HortiNigeria sustainability plan to support the activities required to strengthen the sector beyond the life of the program.

SwanCape Farms - AgroNourish 2 Flourish Hub

+2348033025100 | agnesfasehun@gmail.com | Epe, Lagos State & Irawo, Ijebu Ogun State

A Brief Overview of the Company

SwanCape Farms was established in January 2015. We are producers, processors, and distributors of premium quality vegetables, fruits, herbs, spices, fish, and poultry. Our brand promises to provide the freshest, best quality products of international standards to the ever-increasing population of health-conscious consumers, bearing food safety and environmental sustainability in mind. We responsibly grow our products, employing good agricultural practices, organic principles, integrated pest management techniques, and biodiversity conservation. Our products come from our farms at Epe (Lagos State) and Irawo (Ogun State) and from carefully selected smallholder farmers and growers. SwanCape processes and packages Auntie Geez brand vegetables, smoked catfish, and poultry products in our modern packing facility located in Lagos, Nigeria. Our production systems and post-harvest handling ensures the authentic natural flavors and nutritional values remain in our products until they are consumed. Our products are sold to well-known supermarkets, hotels, restaurants, and caterers as well as to individual homes through our e-commerce website and social media.

Dr. Agnes Fasehun
Managing Director/CEO

Impact

·Increased market access for smallholder and entrepreneurial farmers, with an emphasis on women and youths.

·Reduced post-harvest losses, as farm produce is aggregated, processed, and packaged under optimum phytosanitary conditions through a cold chain until they reach consumers.

·Fairer and more inclusive market prices available for local farmers due to premium pricing from premium markets.

Partnership with HortiNigeria

- Facilitate access to finance for our hub members.
- Build capacity on various technical and soft skills for hub members, such as good agronomic practices, recordkeeping and finance management, and food safety and quality assurance.
- Attract and integrate young farm workers by offering attractive working conditions and the use of labor-saving, low-drudgery methods to address labor shortages.
- Facilitate year-round production.
- Advocate on behalf of hub members with various enablers in the value chain.

Intagris Consulting Limited

0806-813-4944 | info@intagrisconsulting.com | Zaria/Kaduna/Nigeria

A Brief Overview of the Company

Intagris Consulting Limited was established in 2017. We pride ourselves on being grassroot implementers of development plans, working with local producers and actors to sustainably increase production and incomes, improve livelihoods, and boost food security. Our activities include mobilizing local producers, strengthening value chain actors, building capacity, and coordinating the agribusiness cluster. We are the leading grassroot implementers of major development programs for organizations such as the International Fertilizer Development Center (IFDC), Nestle, Oxfam, TechnoServe, International Fund for Agricultural Development (IFAD), World Bank, the Federal Ministry of Agriculture and Food Security (FMAFS), and the Federal Ministry of Environment (FMEV).

Prof. Bashir Sani
Managing Director/CEO

Impact

By building the capacity of farmers to sustainably produce more in quantity and quality and linking various actors in the value chain, we contribute to increased productivity and improved livelihoods while at the same time ensuring sustainable use of resources.

Looking Forward

We aspire to cultivate a future where our innovative solutions empower farmers, enrich households, and elevate communities. Through unwavering commitment to quality, integrity, and social responsibility, we envision becoming a globally recognized and trusted leader, driving positive change in the agricultural landscape. Our vision is to sow the seeds of prosperity, harvest innovation, and cultivate a legacy of enduring impact for generations to come in agriculture.

Selema Agroscience Ltd

• 09079772030 | somidiran@selemaagroscience.com | Abuja, FCT, Nigeria

A Brief Overview of the Company

Selema Agroscience Ltd was established in 2023. Our company is growing in the farming input business in Nigeria. Our first product, Apex-10, is a 100% organic product. It is a fertilizer booster that works with both inorganic and organic fertilizers, a soil amendment, and a biostimulant, making it a three-in-one product. This one-of-a-kind peat extract is made from 10,000-year-old active and complex naturally occurring materials. It helps to reduce herbicide and pesticide use and increases yield by up to 60%, with up to 50% lower fertilizer use. It is also drought resistant, using around 30% less water. Apex-10 is one-third the price of traditional fertilizer. We are slowly building our market share by creating awareness of our product and have found that anyone who uses our product becomes a repeat customer.

Sola Omidiran
Managing Director/CEO

Impact

With more farmers adopting Apex-10, Selema is having a considerable positive impact on agriculture in Nigeria.

Why participate in HortiNigeria activities

Our participation in the HortiNigeria program has helped to showcase our product to farmers in areas where demonstration plots have been established.

Looking Forward

We are looking forward to growing into other areas in farming, with plans to introduce pesticides, herbicides, and hybrid seeds. We also plan to offer affordable farm implements and drone services for applying fertilizer and herbicide for farmers soon.

Bioloop Solutions Ltd

• 08088686657 | iyanuoluwa78@gmail.com | Tipper garage, Mowe Ofada road, Ofada. Ogun state

A Brief Overview of the Company

Bioloop Solutions Ltd was registered in 2020 to revolutionize food systems in Nigeria by reducing import dependence, decreasing greenhouse gas emissions, and improving food security. We have designed a biorefinery that turns waste into wealth for smallholder farmers. Our zero-waste system converts organic waste using black soldier fly larvae. When the black soldier fly larvae eat the waste, they mature quickly and have a high protein content, which makes them a nutritious animal feed. In the feeding process, they break down the organic matter and leave behind a residue that serves as an organic soil amendment.

Bomi Fagbemi
Co-Founder

Impact

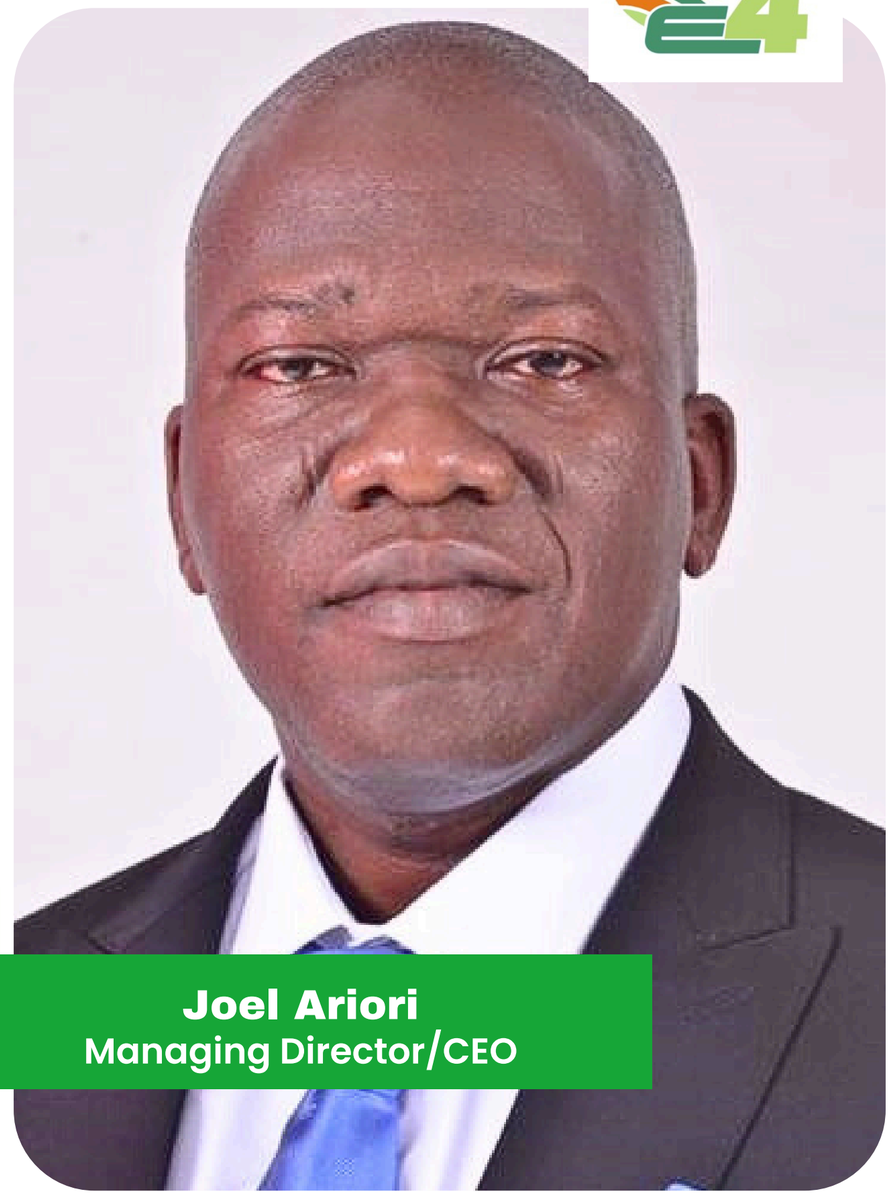
Bioloop creates new jobs and income streams for local farming communities by formalizing the organic waste value chain. We have partnered with more than 100 women cassava farmers to add value to their waste and have processed over 10 metric tons of waste sourced from local farmers, markets, and breweries weekly. Our facility in Ofada, Ogun State, is off-grid and runs entirely on renewable energy. We reduce carbon dioxide emissions by redirecting biomass from unmanaged landfill sites to our facility, reducing chemical fertilizer application, and replacing fishmeal and soy production.

Partnership with HortiNigeria

It is our pleasure to contribute our expertise and knowledge about the production of an organic fertilizer called Biosoil to be used as a source of nutrition for growing the focus crops of the HortiNigeria program. Last year, Biosoil was used as fertilizer in growing cucumber in collaboration with HortiNigeria. We have over 5 metric tons of Biosoil readily available for sale and continuous production of over 300 kilograms daily. We are interested in solving the problem that farmers encounter with poor access to good nutrition for their plant growth and low yield. Biosoil ensures rapid crop growth, soil regeneration, better water retention, and high crop yield.

E4 Farms & Foods Limited

• 08070590856 | info@e4farm.com | Fashola Farm Settlement, Oyo, Oyo State



Joel Ariori
Managing Director/CEO

A Brief Overview of the Company

Established in December 2022, E4 Farms & Foods Limited has rapidly emerged as a significant player in horticulture, particularly in vegetable production. The company has introduced innovative drip irrigation techniques that have revolutionized the local farming practices in Fashola Farm Settlement's fertile expanse in Oyo State.

Impact

E4 Farms & Foods Limited has contributed to local food security by ensuring a steady supply of fresh, high-quality vegetables to the market. This nutritious produce supports the health and well-being of the community, promoting better dietary habits and reducing dependency on imported vegetables. E4 Farms actively engages with the local community through educational initiatives, offering training programs on modern farming techniques and sustainable practices. These programs empower local farmers with knowledge and skills, enabling them to improve their own farming operations and productivity. The company's commitment to community development fosters a collaborative environment, where innovation and traditional farming practices coexist and thrive.

Partnership with HortiNigeria

Partnering with HortiNigeria, E4 Farms & Foods Limited has significantly expanded it's network and capabilities within the horticulture sector. Through this collaboration, E4 Farms was introduced to key stakeholders in the horticulture space, fostering valuable connections and opportunities for growth. The partnership facilitated the adoption of advanced agricultural practices, including the use of seedling trays, which enhance plant development and increase crop yields. Additionally, E4 Farms gained access to broader markets, ensuring a more consistent and profitable distribution of high-quality produce. The company also benefited from capacity-building programs focused on good agricultural practices, which improved their operational standards and sustainability. This strategic alliance with HortiNigeria has empowered E4 Farms to elevate its production processes, market reach, and overall impact in the horticulture industry.

Looking Forward

E4 Farms & Foods Limited is poised for a promising future, building on its innovative practices and strategic partnerships. With a strong foundation in sustainable agriculture and a commitment to community development, the company aims to further enhance its production capabilities and market presence. Looking forward, E4 Farms plans to continue leveraging advanced technologies, such as drip irrigation and seedling trays, to improve efficiency and crop yields. Additionally, the company seeks to expand its educational programs, empowering more local farmers with the knowledge and skills needed for sustainable farming.

HortiNigeria

DDEE Farms

• 08029683044 | ddeespprtservice@gmail.com | Ibadan, Oyo state

A Brief Overview of the Company

DDEE Farms, established in March 30, 2020, is an innovative agricultural enterprise that specializes in the production of high-quality fruits and vegetables, utilizing sustainable practices to ensure food security and environmental stewardship. We cultivate a diverse range of crops, including leafy greens, tomato, cucumber, watermelon, and sweet corn, using cutting-edge technologies to optimize yields and quality. Beyond production, DDEE Farms also creates access to markets for farmers by aggregating their produce, especially fruits and vegetables, providing a stable and profitable outlet for their goods. Through its farming operations and market access initiatives, DDEE Farms promotes food security, empowers local farmers, and supports the growth of a sustainable and equitable agricultural industry.

Oluwadamilola Awe
Managing Director/CEO

Partnership with HortiNigeria

DDEE Farms' strategic partnership with HortiNigeria has proven to be a game-changer for the company. Our aggregation services have seen significant growth, thanks to the creation of hubs that connect us directly with over 120 farmers in our network alone. This collaboration has also enabled us to expand our reach to other entrepreneurial farmers across the southwest states.

As a result, the company has experienced a substantial increase in our influence in the aggregation sector and a strengthened presence in the agricultural industry in the southwest. This partnership has been a pivotal moment for our business, and we are excited to see the continued impact it will have on our growth and success.

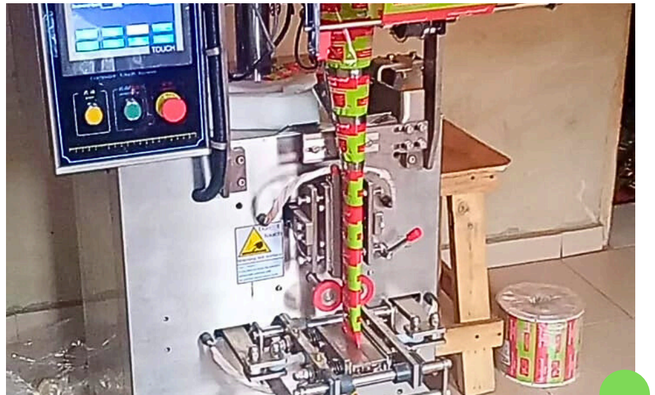
Olanreforward Foods and Farms Limited

• 07033162355 | olanrewajuforward@yahoo.com, olanreforwardfoods@gmail.com | Ibadan, Oyo state

A Brief Overview of the Company

Olanreforward Foods and Farms Limited was established in 2017 and began the commercial processing of pepper into powder to increase availability and affordability of healthy pepper powder year-round for low-income families and the urban poor, which they mostly use for culinary purposes.

Olanrewaju Samuel
Managing Director/CEO



Our impact

Any investment in food processing is a direct investment in poverty eradication and job creation. This company is encouraging inclusive business practices by economically engaging vulnerable urban poor women in sorting and grinding of pepper. This business also ensures fair pay for produce for 200 subsistence pepper farmers by serving as an offtaker of their produce.

Partnership with HortiNigeria

Our collaboration with other players along the value chain, such as International Fertilizer Development Center, Nigerian Export Promotion Council, transporters, and farmers, has helped the business to scale and increase market value. We processed 70 metric tons of fresh pepper into powder in 2023, catering to the culinary needs of about 5 million urban poor and creating employment for 45 marginalized urban women to reduce household vulnerability to poverty.

Kartlos Farms Limited

08022229981 | osinowolabi@kartlosfarmsltd.com, osinowolabi@gmail.com | Akufo Farm Settlement, Ibadan

A Brief Overview of the Company

Kartlos Farms Limited was established in January 2015 and is an indigenous company growing vegetables under a controlled environment.

Osinowo Olowolabi Babatunde
Managing Director/CEO

Our impact

We have created a linkage with other vegetable farmers in the state and piloted the Candel NPK 15-15-15 soluble fertilizer experiment, which helped us to find a balanced solution for our plants.

Integrated Aerial Precision

+2348136163231 | femi@iaprecision.com | Ogun/Lagos State

A Brief Overview of the Company

Integrated Aerial Precision was established in 2022 and is at the forefront of precision agriculture, utilizing cutting-edge drone technology and advanced data analytics to provide innovative and sustainable solutions. Our dedicated team is passionate about revolutionizing the agricultural landscape in Nigeria and across Africa. Through the deployment of state-of-the-art drone technology and data analytics services, we empower farmers and stakeholders with the insights and tools essential for informed decision-making and impactful actions. Our mission is to enhance harvest yields, lower operational costs, and contribute significantly to food security, thereby addressing issues of hunger and poverty. With a commitment to excellence and a focus on technological innovation, Integrated Aerial Precision is poised to lead the way in transforming agriculture, fostering a more sustainable, productive, and resilient future for the continent.

Femi Adekoya
Managing Director/CEO

Our impact

- Improved agricultural practices and market access through our hub activities and coordination.
- Improved crop yield and profitability for entrepreneurial farmers in our hub.
- Helped farmers achieve a good level of precision agriculture through our drone services in farm monitoring and scouting as well as spraying.

Partnership with HortiNigeria

Through our partnership with HortiNigeria, we have trained more than 40 entrepreneurial farmers in good agricultural practices, improved farm recordkeeping, and been offered a better chance to access to finance. We have trained more than 60 youths in drone technology innovation in agriculture, some of whom are now employed by Integrated Aerial Precision and partners.

Greenaly Enterprises

07034204821 | richardobisesan@gmail.com | Odogbolu, Ogun State

A Brief Overview of the Company

Greenaly Enterprises, established in 2012, is a pioneering agricultural company specializing in fish breeding and the cultivation of vegetable crops. We pride ourselves on our diverse range of freshwater fish, extending beyond the commonly farmed catfish to include species such as Pangasius, Brama, rohu, tilapia, carp, and ornamental fish, including as Japanese koi, platys, guppies, angelfish, and goldfish. We offer fish breeding services by producing a variety of freshwater fish, catering to both food markets and ornamental fish enthusiasts. In addition, we develop high-quality seedlings, with a production capacity of over 400,000 seedlings, available for sale to farmers. We also design and build custom aquariums for both personal and commercial use. Our ongoing project focuses on precision farming in aquaculture, utilizing technology to enhance productivity and sustainability.

Richard Oladayo Obisesan
Managing Director/CEO

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Our impact

- Breeding of Diverse Freshwater Species: We have successfully introduced and cultivated Pangasius and Brama, which offer diverse options for the market and demonstrate our commitment to innovative aquaculture practices.
- Unique Tilapia Broodstock Development: We have developed a unique type of tilapia broodstock, known for its enhanced growth rate and disease resistance. This innovation ensures higher yields and sustainability, setting our products apart in the aquaculture industry.

Partnership with HortiNigeria

- Aquaponics Project Involvement: Provided technical support and expertise in integrating aquaponics systems that will enable successful cultivation of vegetables using wastewater from fish ponds, enhancing sustainability.
- Networking with Farmers: Facilitated connections with other farmers and agricultural professionals, which promots knowledge sharing and collaboration within the farming community.
- Agricultural Linkages: Strengthened our ties with key players in the agricultural value chain and also improved our access to resources and markets, boosting our operational efficiency.
- Updates in the Agricultural Space: Regularly provided with updates on the latest trends, technologies, and best practices in agriculture, keeping us informed about innovations and developments in the sector.
- Community Development Opportunities: Supported our initiatives to empower local communities through an integrated farming system and collaborated on projects such as Empowering Communities through Integrated Aquaculture and Sustainable Agriculture (ECTIASA).
- Increased Visibility: Helped us gain exposure and recognition within the agriculture sector, which enhanced our visibility, leading to new partnerships and opportunities.

GREEN DEVELOPMENT & AGRO ALLIED SERVICES LTD

+2347039290924, +2348141614279

:Info@greendevelopment.org.ng
www.greendevelopment.org.ng

26, Ondo road, Akure, Ondo state..
Farm: Ajumose vegetable village, Ajeja, Oyo state.

A Brief Overview of the Company

Green Development and Agro-Allied Services was established in January 2019. Our vision is to be a leading agribusiness firm that provides sustainable and climate-smart solutions to farmers on a global scale. Our mission is to inspire productive and sustainable farming. Green Development and Agro-Allied Services is an emerging agribusiness aiming to advance productive and sustainable agriculture in Nigeria by establishing and managing environmentally responsible farms. Our goal is to increase local food production and provide communities with safe, healthy, and high-quality food products. We value innovation and collaboration and intend to make a positive impact on the lives of our farmers and the communities we serve. Leveraging our farming knowledge and strong collaboration with farmers, we offer: farm management services, where we handle every aspect of farm operations for busy entrepreneurs; technical assistance and training, by providing farmers with the knowledge and skills for success; farm worker recruitment and training, where we source and train reliable farm staff; farm consultancy services, offering expert advice to existing farm owners on a fee basis; input recommendations and sales; and fresh vegetable production and aggregation, where we cultivate and collect fresh vegetables for diverse target markets.

Kayode Ogundayomi
Managing Director/CEO

Our impact

- In the past five years, we have planned, implemented, and partnered on projects that have played a pivotal role in enhancing local food production and ensuring that communities, particularly in southwestern Nigeria, have access to safe, nutritious, and high-quality products. Some of these projects include:
- Facilitating the development of an inclusive and sustainable horticulture sector through hub creation, with access to resources for capacity building, access to finance, and business-to-business linkages.
- Trained 167 youths on commercial production of vegetable (tomato and others).
- Partnered with the Zero Food Waste Initiative to educate 1,212 young people and farmers on sustainable food production and consumption through the TRASHNOT'23 campaign.

Partnership with HortiNigeria

Through our partnership HortiNigeria, we have been able to achieve the following:

- Business capacity development through trainings.
- Hub creation and onboarding of about 95 entrepreneurial farmers.
- Creation of business-to-business linkages across Oyo and Ogun states.
- Pilot of the Bioloop innovation, a cost-effective approach to soil enrichment.
- Distribution of easy-to-use recordkeeping books for over 90 entrepreneurial farmers.

Fourlas Foods Ventures

08028071609 | solwas2001@yahoo.com | Odolewu Ijebu

A Brief Overview of the Company

Fourlas Foods was established in December 2018 as an agricultural business focused on vegetable production in Mojoda and Epe and seedling production at Odolewu Ijebu.

Sedun Wasiu
Managing Director/CEO

Our impact

- Enlightened the community on possibility and production of veggies as against their usual way of cassava farming business.
- Created job opportunities for the community, particularly for women, through seedling production.
- Promoted organic media in seedling production.

Partnership with HortiNigeria

- Improving entrepreneurial farmer technical capacity through training and demonstration.
- Fostering inclusive collaboration and partnership among the value chain actors.
- Creating awareness on the possibility of access to finance.

Onelife Initiative

08094232675, 08039210905 | contact@onelifeinitiative.org | Oyo State, Ekiti State and Akwa Ibom State.

A Brief Overview of the Company

Onelife Initiative was established in 2018. Our niche is bridging the gap in good agronomic knowledge and practices, access to markets, and finance mobilization readiness in agribusiness, with an emphasis on youths within on-farm and off-farm points. Our major focus is offering business support and innovation services to farmers, producer organizations, and value chain actors within rural and suburban communities while also linking them to institutions and resources to improve the quality of their livelihoods. Onelife Initiative is a leading indigenous non-profit organization. Some of our notable recognitions include an award from IFDC's 2SCALE program in recognition of the unique services we render to value chain actors, especially smallholder farmers in Nigeria.

Sola Fagorusi
Managing Director/CEO

Our impact

Our contribution to the horticulture sector has been bringing a deepened understanding of the key actors and issues in the sector. We leverage the sector's knowledge to provide linkages with resources and institutions to producer organizations and groups. We also have introduced innovations in horticulture to over 1,000 entrepreneurial and smallholder farmers across Oyo State with support from HortiNigeria. In doing this, we are also stretching to include opportunities for market aggregation and readiness for access to finance products.

Partnership with HortiNigeria

HortiNigeria is arguably the broadest base for the horticulture sector in Nigeria, operating from four states. From market intelligence and issues of market access to adaptation of innovations, new trends in access to finance, and access to quality inputs, the program understands the needs for development of the horticulture sector.

Looking Forward

As part of our strategic plan as a predominantly youth-serving organization, we are focusing on sustainability in agricultural production through organized group production while also providing financing options, advisory services, and organization of cooperatives and clusters using a non-cash approach.

Tyragrow Farms

+2348101018596 | akinbotife@gmail.com | Imasayi Yewa North Ogun State

A Brief Overview of the Company

Tyragrow Farms was established in 2021 and is involved with the cultivation of tomato, pepper, cucumber, and leafy vegetables. Sitting on an expanse of 10 acres, Tyragrow Farms has adopted innovations such as the use of hybrid seeds, seedling trays, and drip irrigation.

Maybee Boluwatife
Managing Director/CEO

Partnership with HortiNigeria

With the help of HortiNigeria, Tyragrow Farms was able to secure a business loan to install a borehole on the farm. This has helped tremendously in achieving our goals and ensuring year-round production.

Federal University of Agriculture, Abeokuta (FUNAAB)

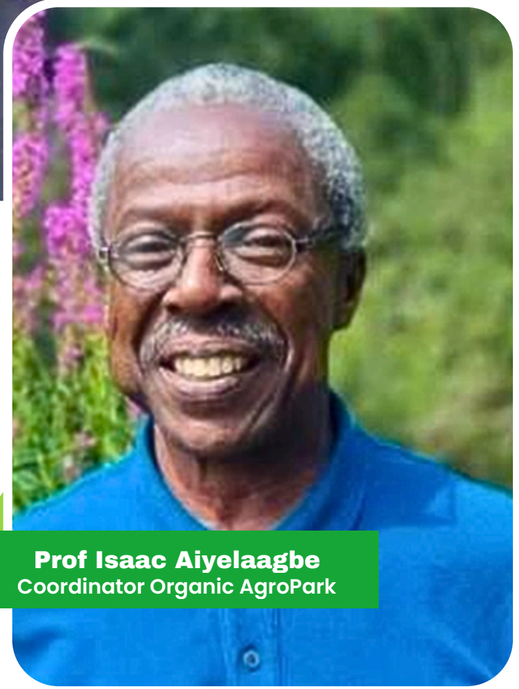
Prof. O. B. Kehinde
Vice-Chancellor FUNAAB



Prof Isaac Aiyelaagbe
Coordinator Organic AgroPark

A Brief Overview of the Company

FUNAAB, established in 2019, trains youths on commercial organic vegetable production, improved varieties, seedling production, crop spacing, canopy management, compost production and application, biocide formulation and application, solar-powered drip irrigation systems, diversification of the vegetables offered for sale, input calibration, and farm support through problem-solving.

Our impact

We have built the capacity of about 100 youths in entrepreneurial production and marketing of fresh organic vegetables, such as tomato, amaranth, sweet corn, and cabbage, the use improved technologies, and sales of fresh vegetables year-round.

Partnership with HortiNigeria

- Developed business-to-business linkages with input suppliers and growers.
- Conducted technology verification trials.
- Offered advisory services in organic vegetable production.
- Served as the hub for HortiNigeria knowledge and skills enhancement workshops.

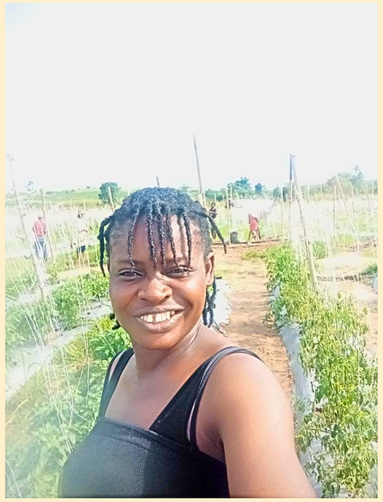
Posh and Lush Farms Ltd

08030619448 | poshfarmsng@gmail.com | Simawa, Ogun state.

A Brief Overview of the Company

Posh and Lush Farms Ltd was established in November 2021 and incorporated in October 2023. We use innovations such as the drip irrigation system, mulching films, and improved seeds to produce healthy and commercially viable vegetables for the market. Since inception, we have produced tons of vegetables for supply to both the local market, increasing the local supply by 15%, and to distant retailers. We have made vegetables more available and affordable for the local community.

Ruth Titilayo Ariyo
Technical and strategic lead



Our impact

Since onboarding, HortiNigeria has ensured a steady access to material and immaterial support, exposing us to various agencies and partnership that can help to boost capacity. Various training programs, both on-site and off-site, have increased our knowledge base.

Partnership with HortiNigeria

Though Posh and Lush Farms Ltd is a newly onboarded hub, HortiNigeria is already facilitating our partnership to enable us and our players to enjoy access to finance and other resources that will facilitate increased and better production to meet our never-ending demand. We are hopeful for a strong working relationship with the program.

Supero Agrobase Limited – Harvest Yield Farm

+234 803 945 9501 | superoincorporation@gmail.com | Plot 51 Supero Agrobase Limited farm estate, Abule Ake, Kobape, Ogun

A Brief Overview of the Company

Supero Agrobase Limited is an agricultural company, registered in 2018 as Harvest Yield, that provides fruits and vegetable products, agro-inputs, and agricultural services. Through our 50 hectare farm estate, we focus on vegetable production of tomato, cucumber, sweet corn, watermelon, and pepper. We provide farm management and consultancy services and partner with other reputable companies to offer soil analysis, fertilizer and manure analysis, and other laboratory services necessary for successful growing.

Adetola Damilola Jimoh
Technical and strategic lead

Our impact

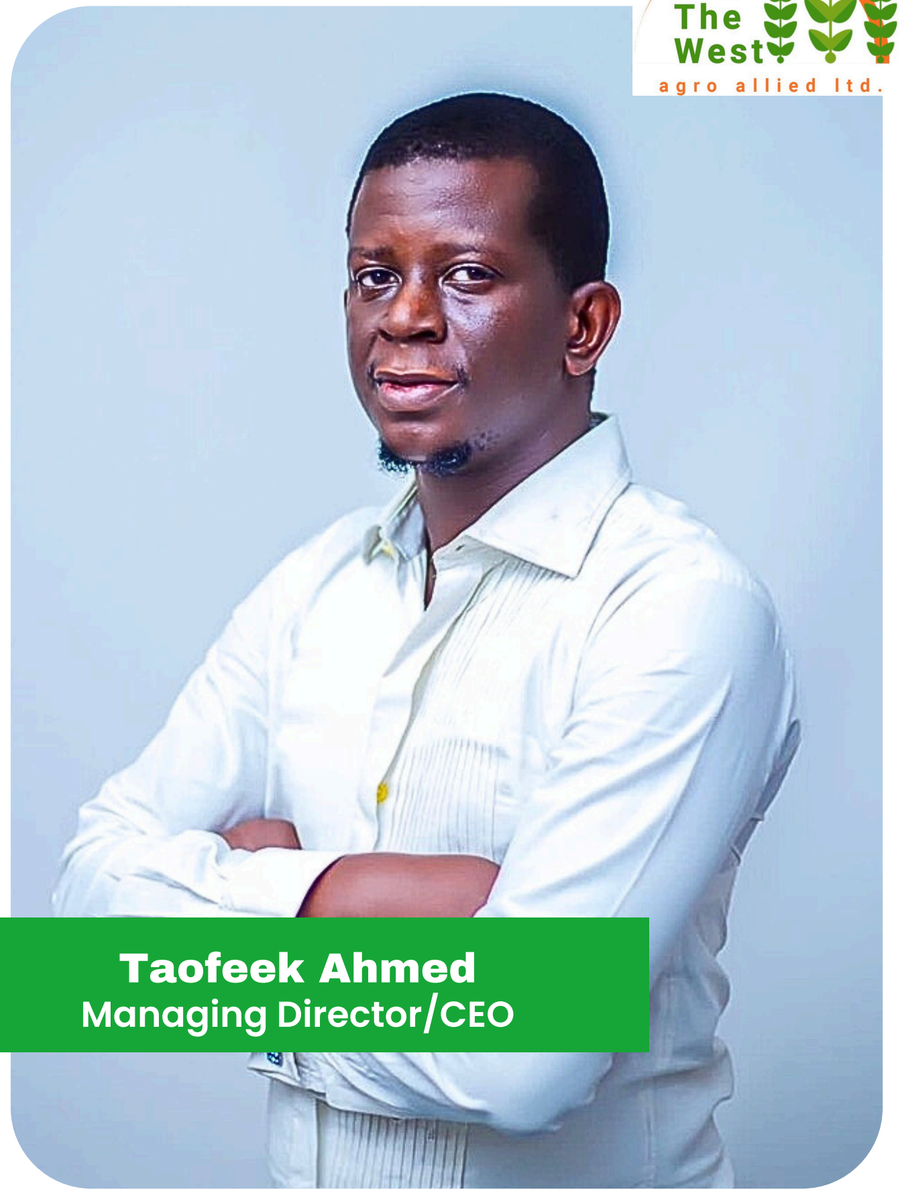
The Innovation Harvest Yield Hub Pilot marks a significant step forward in revolutionizing commercial onion production in the southwest region. Spearheaded through a collaborative effort among farmers, agricultural experts, and technology innovators, this initiative aims to optimize yields, enhance sustainability, and boost profitability within the onion farming sector. Furthermore, the pilot explores innovative farming techniques and practices tailored to the unique characteristics of the southwest. From optimized irrigation strategies to customized pest management solutions, participating farmers have access to a toolkit of innovative approaches designed to enhance productivity while minimizing the environmental impact.

FEED THE WEST AGROALLIED COMPANY

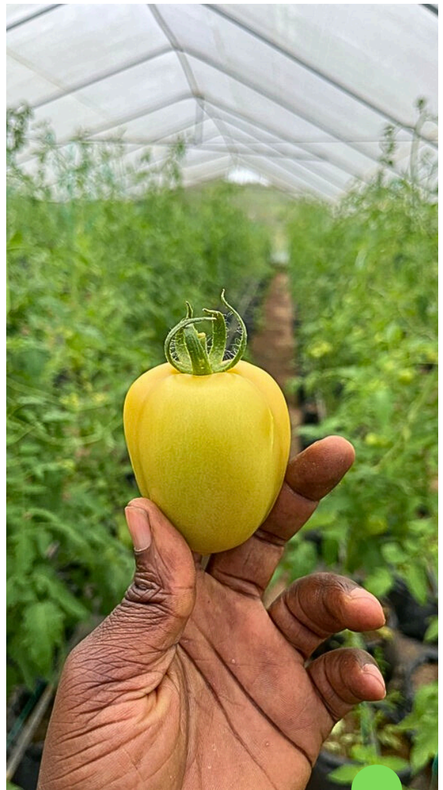
08082655222, 08184077738 | Feedthewestagroallied@gmail.com | Okose Village, off Ido road, near Odetola town, Ido Local Government Area, Odetola, Ibadan, Oyo State, Nigeria

A Brief Overview of the Company

Feed the West was established in 2015 to engage in crop farming, fisheries, and snail production. Located at Okose Village, Oyo State, the farm consists of over 30 acres of prime property used for open crop farming and has over 10 greenhouses, mainly for the production of tomato, pepper, and exotic vegetables for the expatriate community in Ibadan, Lagos, and surrounding areas. Other major crops include maize, pawpaw, plantain, bananas, and more than 20 other crop varieties. Our mission is to use modern business tools and management techniques to feed people and encourage youths to take on agriculture as a business by providing them with the needed skills.



Taofeek Ahmed
Managing Director/CEO



Our impact

We provide business solutions to achieve food security and eliminate post-harvest losses through the provision of world class capacity building programs for farmers and practitioners in the value chain. We improve the incomes and livelihoods of rural communities through sustainable agricultural practices and entrepreneurship to keep them involved in agriculture and make agriculture profitable to ensure a sustainable increase in food production to avert
hunger.

Partnership with HortiNigeria

Our partnership with HortiNigeria is helping to achieve our goal of feeding both Africa and the rest of the world by cultivating a sizeable number of agripreneurs throughout the continent and concentrating on agricultural value chain development and agritech to create green jobs. We are making agriculture viable to guarantee a steady rise in food production to prevent hunger.

CKB Farms

08035674692 | olubiyichristianah@gmail.com | Ibadan

A Brief Overview of the Company

CKB Farms, established in February 2015, is a technology-driven company that explores conventional approaches in producing fresh, healthy, and high-quality hybrid tomato, pepper, watermelon, etc. CKB Farms is primarily focused on the use of hybrid seeds and irrigation.

Olubiyi Kehinde C.
Managing Director/CEO

Our impact

CKB Farms has contributed to food security in Nigeria by bridging the supply gap in the value chain as well as revolutionizing the agriculture sector.

Partnership with HortiNigeria:

Our partnership with HortiNigeria has increased our knowledge base, expertise, and the availability of resources to make better products. Working together gives us the opportunity to grow and expand our business.

GWAREE TECH SOLUTIONS AND INVESTMENTS Ltd

07086558464 | gwaree.ng@gmail.com | Jos, Plateau State, Nigeria

A Brief Overview of the Company

GWAREE Tech Solutions and Investments Ltd stands out in the Nigerian horticulture sector with its innovative GWAREE HASS system. By integrating value chain management, the company enhances the sustainability of horticultural practices through advanced technologies and expert management. GWAREE supports over 70,000 farmers, manages over 50,000 hectares of land, and handles more than 20,000 metric tons of agricultural products annually.

Abel Baraya
Managing Director/CEO

Our impact

GWAREE's contributions to the Nigerian horticulture subsector are substantial, boosting local economies, increasing agricultural productivity by 30%, and raising household incomes by over 50%. The company has also driven the adoption of over $3 million worth of innovative agricultural technologies. Through GWAREE FRESH Xpress, the company provides critical market access to farmers, enhancing nutrition and lifestyle in major urban centers like Abuja and Lagos.

Partnership with HortiNigeria

GWAREE has partnered with HortiNigeria to further its mission of revitalizing the agricultural landscape. This collaboration focuses on expanding digital technologies to enhance productivity and sustainability in the horticulture sector. Together, they aim to establish food relief initiatives and strengthen connections between urban centers and rural production hubs.

Looking Forward

Looking ahead, GWAREE envisions becoming a leading catalyst for sustainable development in Nigeria. The company plans to continue leading innovations and expanding its impact through strategic partnerships and technological advancements. This forward-thinking approach promises to uplift communities and ensure a prosperous, equitable future in the horticulture sector.

Global Agri Projects and Consultancy Services Nigeria Limited

• 08131821980 | gapnig@yahoo.com | Kano Nigeria

A Brief Overview of the Company

GAP Consulting, established in 2010, is a key player in supporting grassroots agricultural development across Nigeria. As a registered consulting firm, GAP Consulting is devoted to empowering farmers, businesses, and organizations with essential knowledge and tools to flourish in the agricultural sector.

Professor Aminu Suleiman
Managing Director/CEO

Our impact

GAP Consulting has significantly advanced the agricultural sector by delivering a comprehensive suite of services. The company provides farmers with best practices and essential knowledge through its Agricultural Extension Services. It focuses on Value Chain Analysis and Coordination, optimizing both agricultural and non-agricultural commodity value chains for improved efficiency. In Agribusiness Development, GAP offers critical services such as business plan development, feasibility studies, and market information systems that empower businesses to thrive. Additionally, its capacity building programs train and support farmers, NGOs, and government institutions, ensuring a well-equipped agricultural workforce. The company excels in Project Management, overseeing the successful implementation of diverse agricultural projects, and in Cluster Development, it plays a crucial role in the formation and strengthening of agribusiness clusters, fostering collaboration and growth within the sector.

Looking Forward

GAP Consulting is actively working to transform Nigeria's agribusiness landscape with its innovative project, the Integrated Agribusiness Incubation and Innovation Hub, which is expected to be fully operational by November 2024. This hub aims to become a pivotal resource for the agricultural sector by offering a range of supportive services. It will provide co-working spaces, mentorship, and essential resources to nurture early-stage agribusinesses, fostering their growth and sustainability. Furthermore, the hub will support the creation and implementation of innovative agricultural solutions, enhancing the sector's efficiency and output. Additionally, it will offer educational programs through training and workshops, aimed at enhancing the knowledge and skills of those involved in agribusiness. The hub also plans to facilitate networking opportunities, connecting agribusinesses with potential partners, investors, and customers. This initiative is expected to make a significant contribution to the economic development of Nigeria by strengthening its agribusiness ecosystem.

Looking Forward

“Our vision for the future of mix condiment Nig Ltd is to expand our processing capabilities and increase our footprint in both domestic and international markets. We plan to introduce innovative products that cater to evolving consumer preferences and leverage advanced technologies to enhance efficiency and sustainability. Our key upcoming initiatives include launching eco-friendly packaging solution, implementing precision agriculture techniques and expanding our farmer support programs. As industry leaders, we are committed to driving trends in sustainable agriculture and food security, aiming to set a new standard in the horticulture sector.

MEVITAS LLP

+91 9979511103 | parshvashah@mevitas.in ; info@mevitas.in | Surat, Gujarat – India.

A Brief Overview of the Company

MEVITAS was established in 1994, we revolutionize agriculture with cutting-edge biological innovations, enhancing soil and plant health for sustainable, high-yield farming. Our advanced solutions empower farmers with eco-friendly, effective products that promote robust growth, resilience, and productivity.

We specialize in a range of advanced biological agri-products designed to enhance agricultural productivity sustainably:

- Biofertilizers: Our biofertilizers enrich the soil with essential nutrients, promoting healthier and more robust plant growth while reducing dependency on chemical fertilizers.
- Biostimulants: These products boost plant growth and stress resistance, enhancing crop yields and quality by stimulating natural processes within the plant.
- Bioinsecticides: Our eco-friendly bio-insecticides offer effective pest control without harming beneficial insects or the environment, ensuring healthier crops and ecosystems.
- Soil Health Solutions: We provide comprehensive solutions to improve soil structure, fertility, and microbial activity, fostering a thriving soil ecosystem essential for sustainable agriculture.

MEVITAS is committed to advancing agriculture through innovative, environmentally responsible products that support both the farmer and the planet.

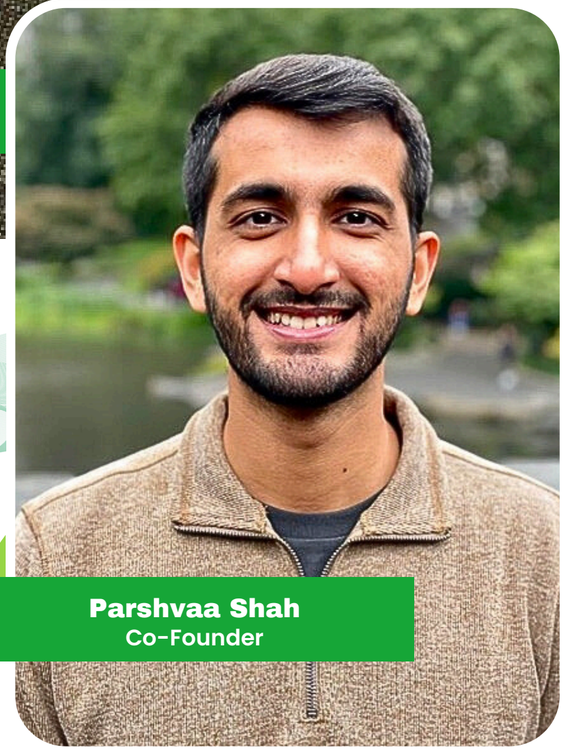
Founder

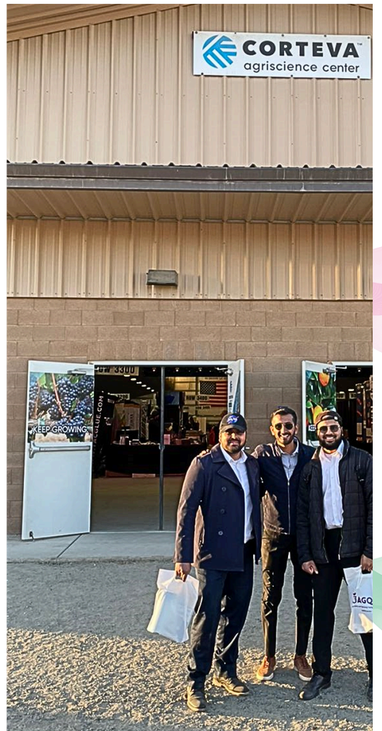
MEVITAS
PASSIONATE FOR INNOVATION



Parshvaa Shah
Co-Founder

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR



Our Impact

MEVITAS recently collaborated with HortiNigeria, a project by the International Fertilizer Development Center (IFDC), to evaluate the impact of our soil health solution. This partnership aimed to demonstrate how advanced biological innovations can significantly enhance agricultural productivity and sustainability.

Through this collaboration, we implemented our cutting-edge soil health solution across various farms in Nigeria. These solutions included our soil health treatments designed to improve soil structure, fertility, and microbial activity. The primary objectives were to boost crop yields, enhance plant health, and reduce the dependency on chemical inputs.

The results of this collaboration were remarkable. Farmers reported significant improvements in soil quality, with enhanced nutrient availability and increased microbial activity. This led to healthier, more robust plants with higher resistance to stress and diseases. Crop yields saw a notable increase, translating into better economic outcomes for the farmers involved.

Moreover, the use of our eco-friendly product contributed to a reduction in the environmental impact of farming practices, aligning with our commitment to sustainable agriculture. The success of this project with HortiNigeria (IFDC) underscores the effectiveness of MEVITAS's soil health solution and reinforces our dedication to supporting farmers with innovative, sustainable agri-products that drive positive change in agriculture.

Partnership with HortiNigeria

MEVITAS is thrilled to announce the fruitful outcomes of our collaboration with Horti-Nigeria. This successful partnership has showcased the transformative power of our biological innovations in enhancing soil health and agricultural productivity. We invite fair participants to join us in this exciting journey towards sustainable agriculture.

Looking Forward

At MEVITAS, our vision for the future is centered around advancing sustainable agriculture through continuous innovation, strategic expansion, and proactive adaptation to industry trends.

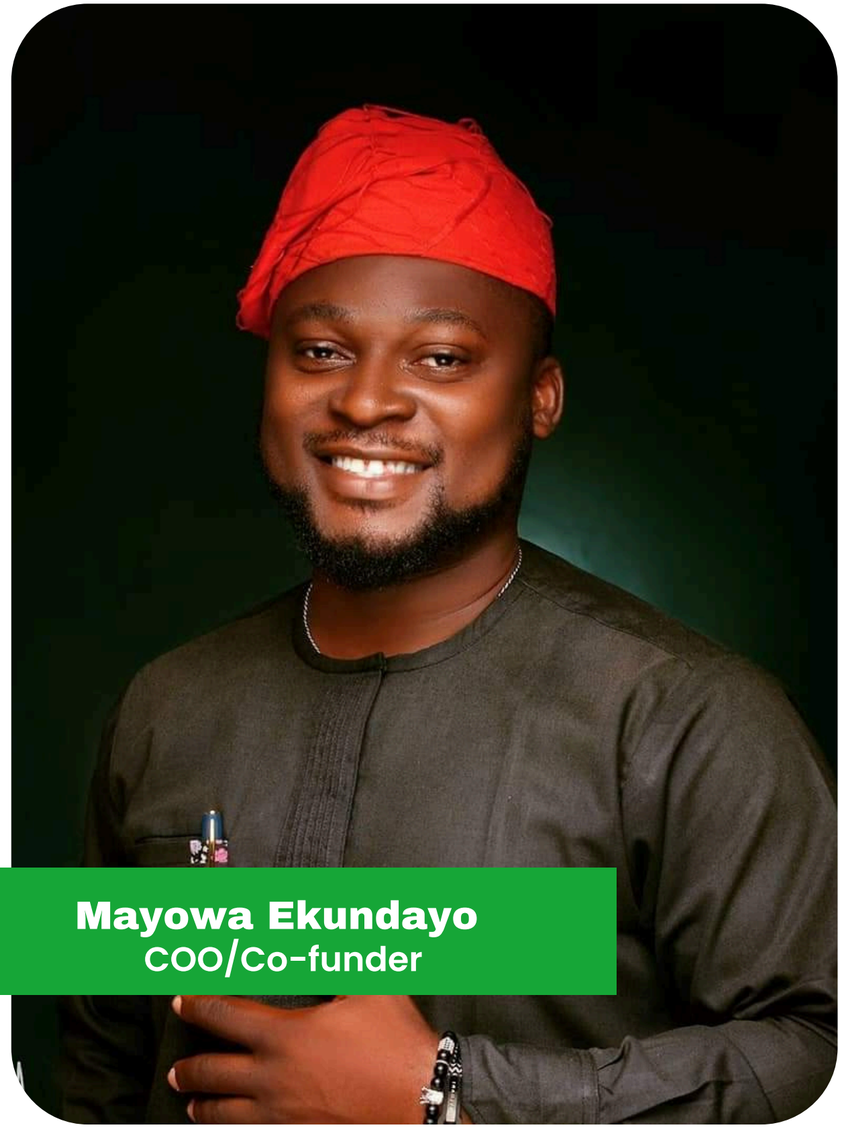
POSTAGVEST SOLUTIONS

• 08030675412 | Postagvestsolutions@gmail.com | Ekiti, Nigeria



Mayowa Ekundayo
COO/Co-funder

A Brief Overview of the Company

Postagvest Solutions Ltd (RC: 1998589) is a social enterprise start-up that provides solutions to the low productivity of smallholder farmers while enhancing households' access to safe, nutritious foods. We are dedicated to:

- Empowering young Nigerians and women through sustainable agriculture practices.
- Bridging farmer-market linkage gaps
- Reducing post-harvest losses

What we are doing differently?

- Developing local and rural markets for wider market linkage opportunities for the smallholder farmers within the communities we work with
- Partnership with other agriculture stakeholders to facilitate value-packed entrepreneurial training and capacity building for the farmers within our communities
- A partnership approach with the cluster farmers we formed within the communities to foster the efficiency of a vertical business relationship.

Horti Nigeria

BUILDING A SUSTAINABLE & INCLUSIVE HORTICULTURE SECTOR

Our Solution

Double-edged solution through our market linkage operations and also through the Raise A Farmer Initiative (RAFI) Programme, we address these challenges by:

Providing training in smart and sustainable farming practices to support rural smallholder farmers, especially youths and women.
Linking farmers directly to markets, facilitating market access and economic opportunities.
Improving supply chains, enhancing productivity and income through technology and best practices.

Partnership with HortiNigeria

Facilitated financial inclusion innovations for some HortiNigeria farmers as well as, presently, gifted one farmer group a digital scale to facilitate their record-taking.

Tractions and Milestones

- Operating in 2nos states in South West Nigeria (Ekiti and Ondo States)
- Officially commenced operations in March 2023
- Supplied over 45 metric tons of vegetables in eighteen months.
- The gross revenue for the first eighteen months of operation is about N 57.2 million with a net profit of about N14.3 million.
